ReturnSafe

App design for iOS and Android

Every screen of version 1.0, the brand, the component system and the navigation map. React Native (Expo) and Firebase, US launch.

CONTENTS

1 · Cover 2 · Brand 3 · Components 4 · Navigation 5–15 · Screens

VERSION

1.0 · November 12, 2026

FRAMES

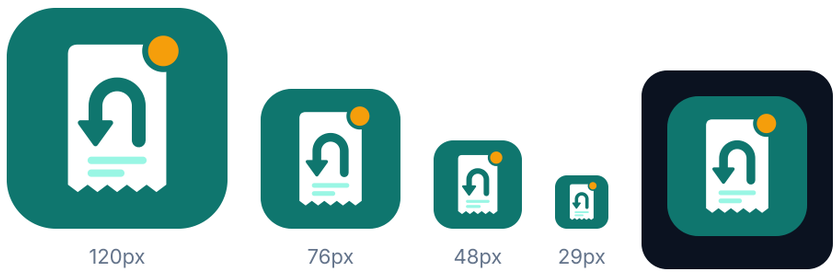

iPhone 375×812 · Android 375×812

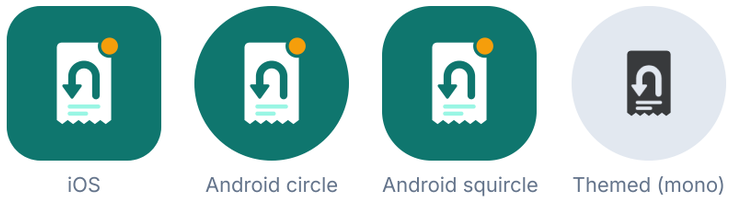

Logo, colours and type

LOGO

ReturnSafe

Never miss a return again

Receipt = what you keep. U-turn arrow = taking it back. Amber dot = the reminder. The Android foreground keeps the mark inside the 66% safe zone so no launcher mask clips it.

TOGGLES AND CHOICES

PRO

DEADLINE PILLS

2 days · 5 days · 23 days · Returned · Kept · Expired

Red: 0–2 days left. Amber: 3–7 days. Grey: 8+ days or expired. Colour is never the only signal: the number of days is always written.

FILTER CHIPS

All 12 · Due soon 3 · Returned 5

LIST ROW AND BANNERS

T **Target**
Kids sneakers, bath towels · $48.20
2 days

Reminders are off. Turn them on.

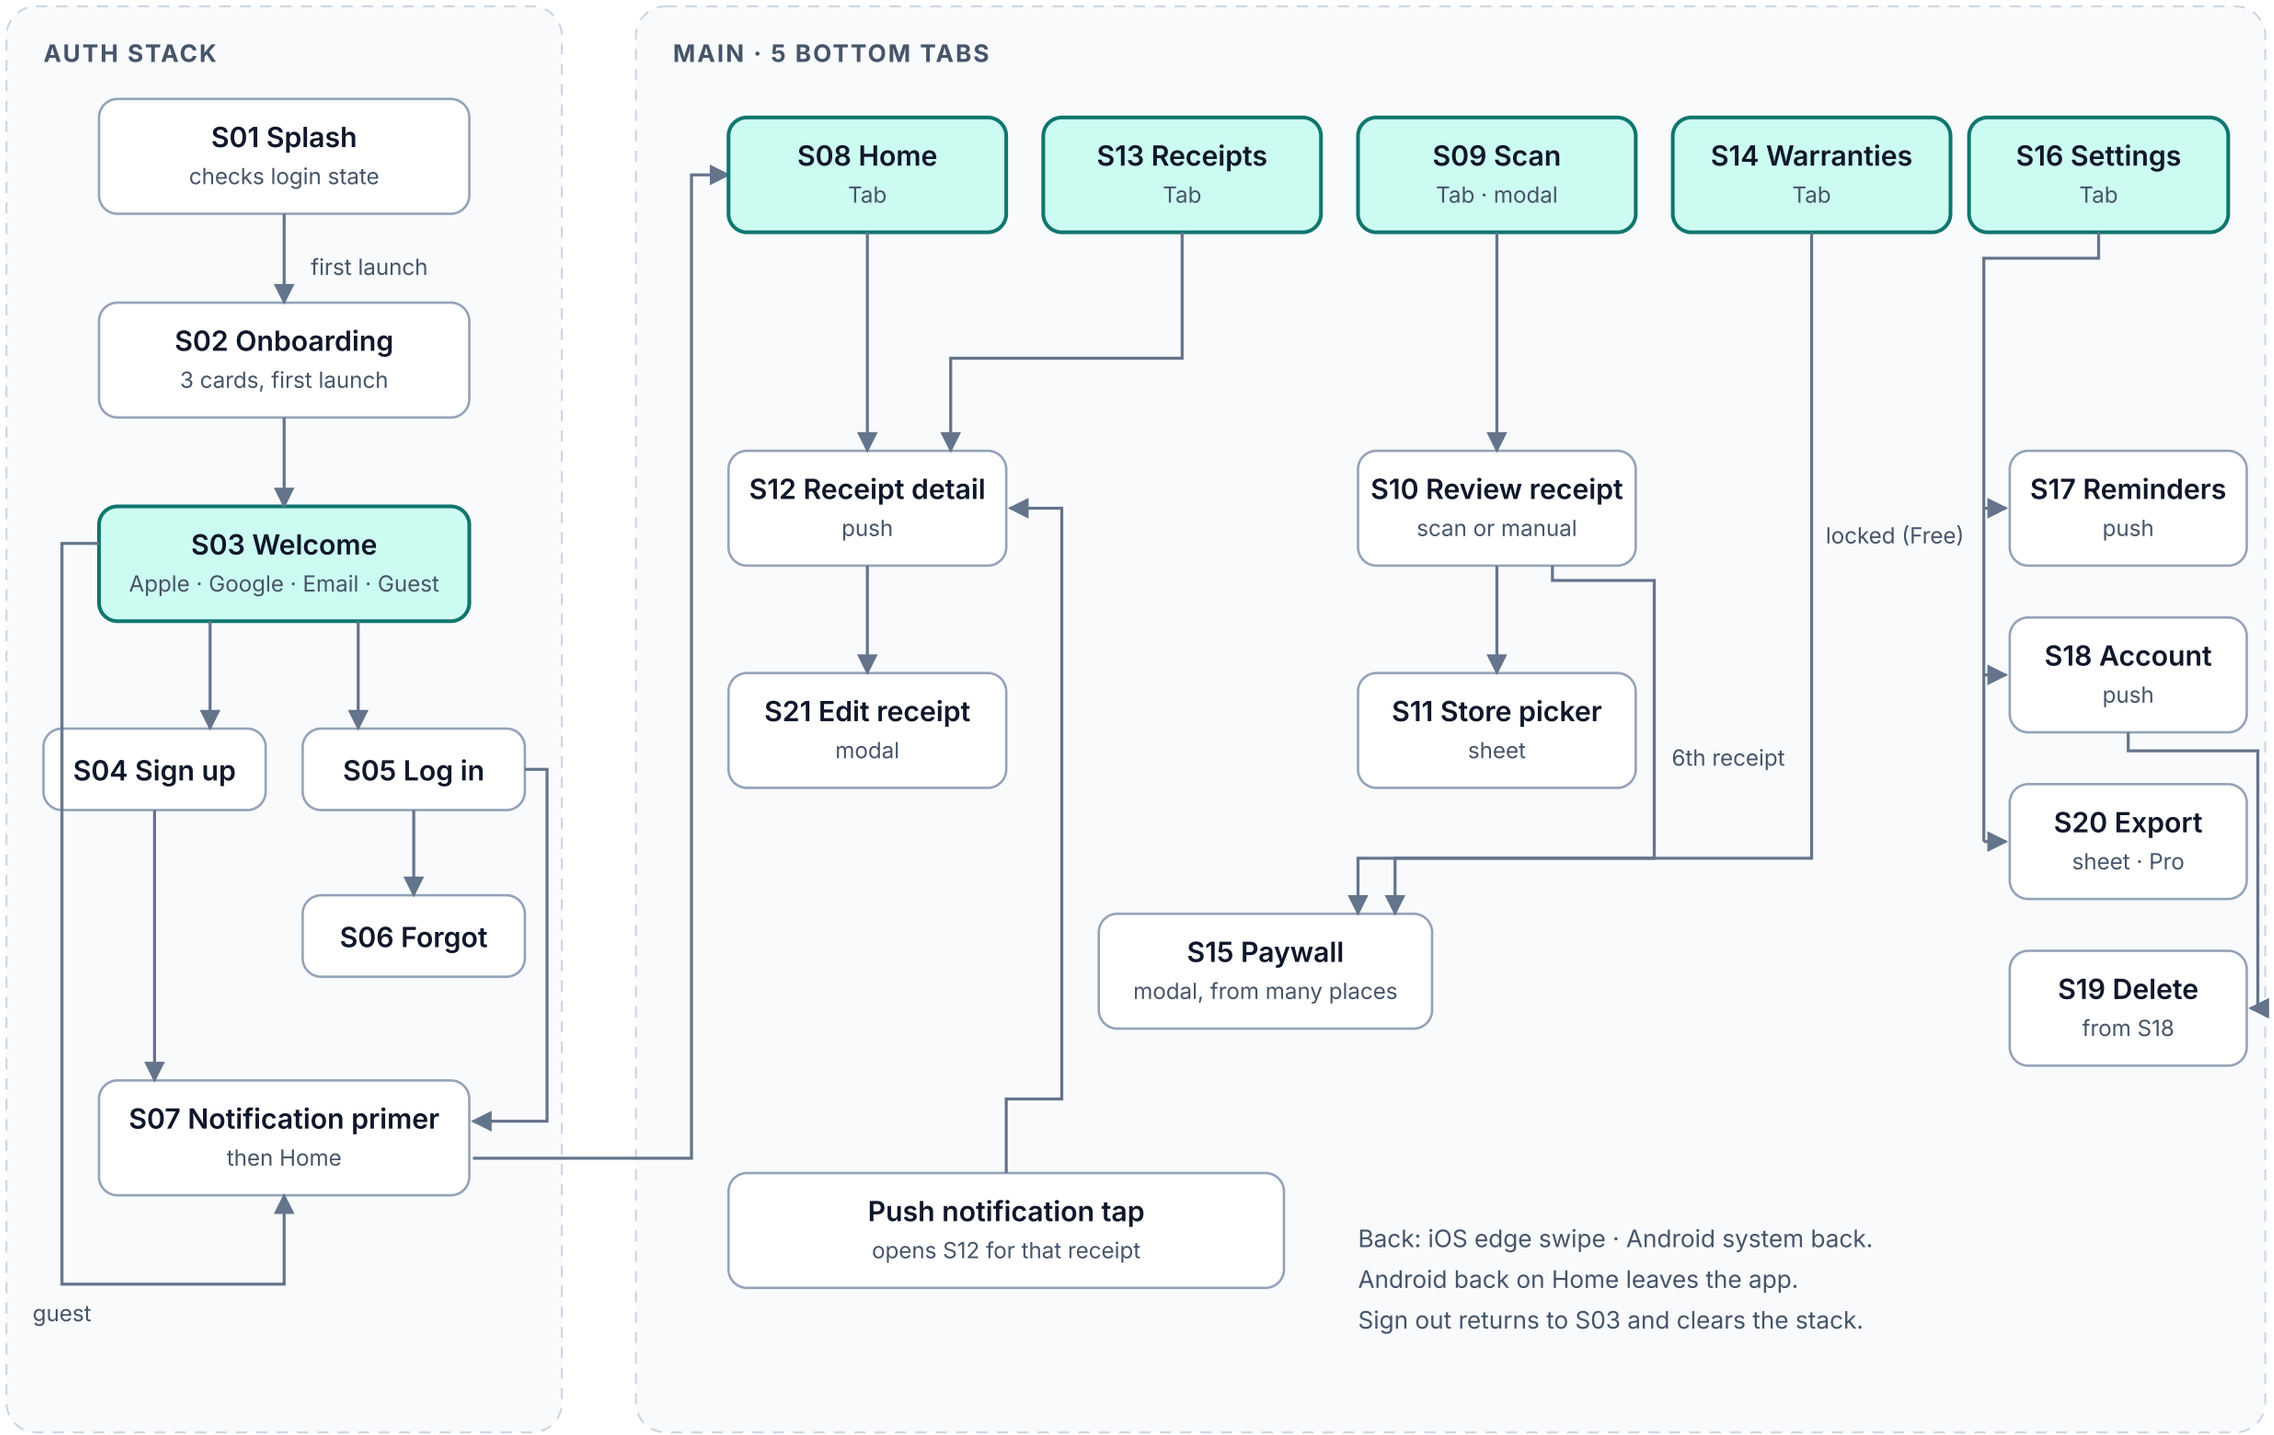

You're using a guest account.

You're offline. Changes will sync later.

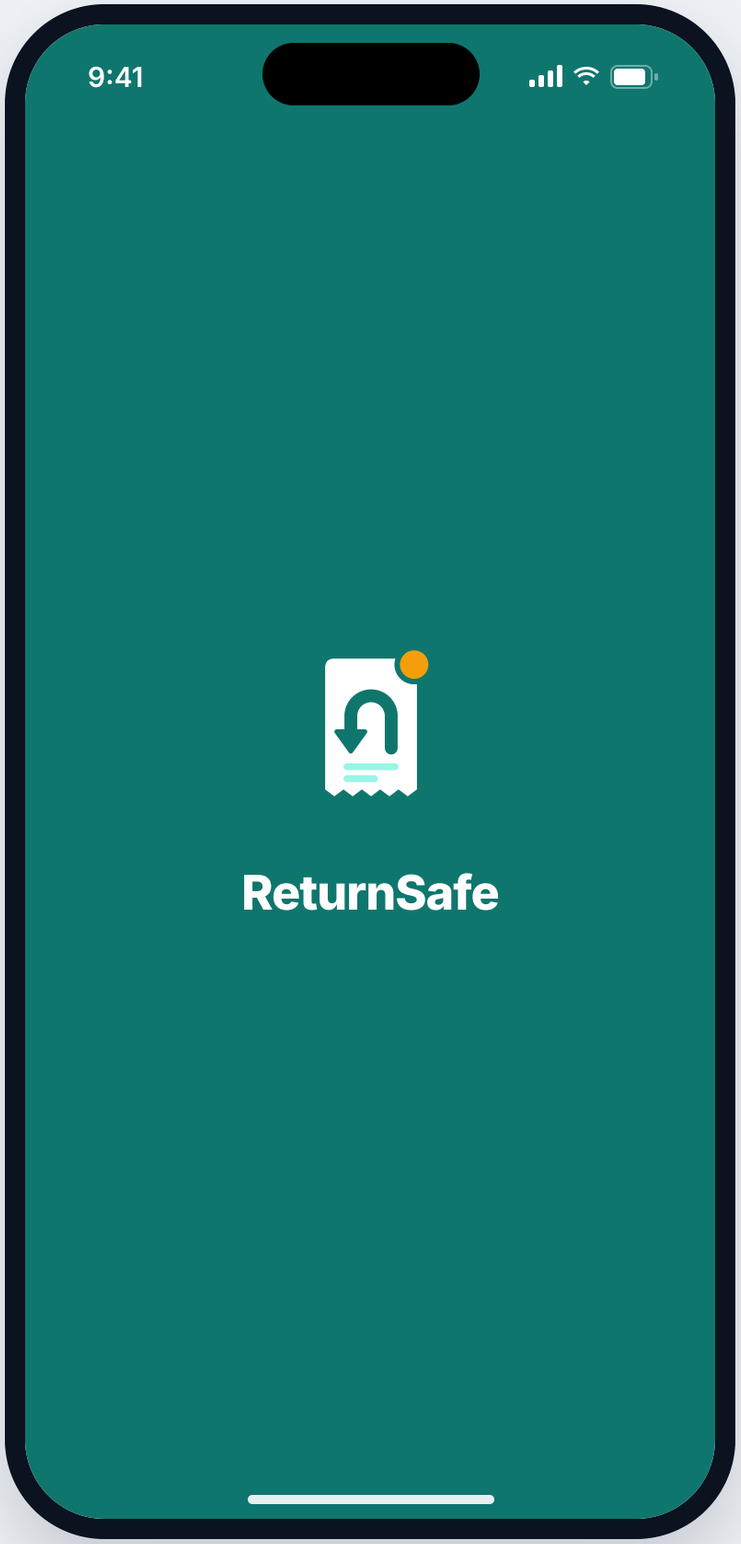

SPACING

4-point grid · screen padding 20 · card radius 16 · gap between cards 12 · tap targets at least 48×48 (meets Apple 44 pt and Android 48 dp) · text scales with the system up to 1.4×.

Navigation map

Splash and onboarding

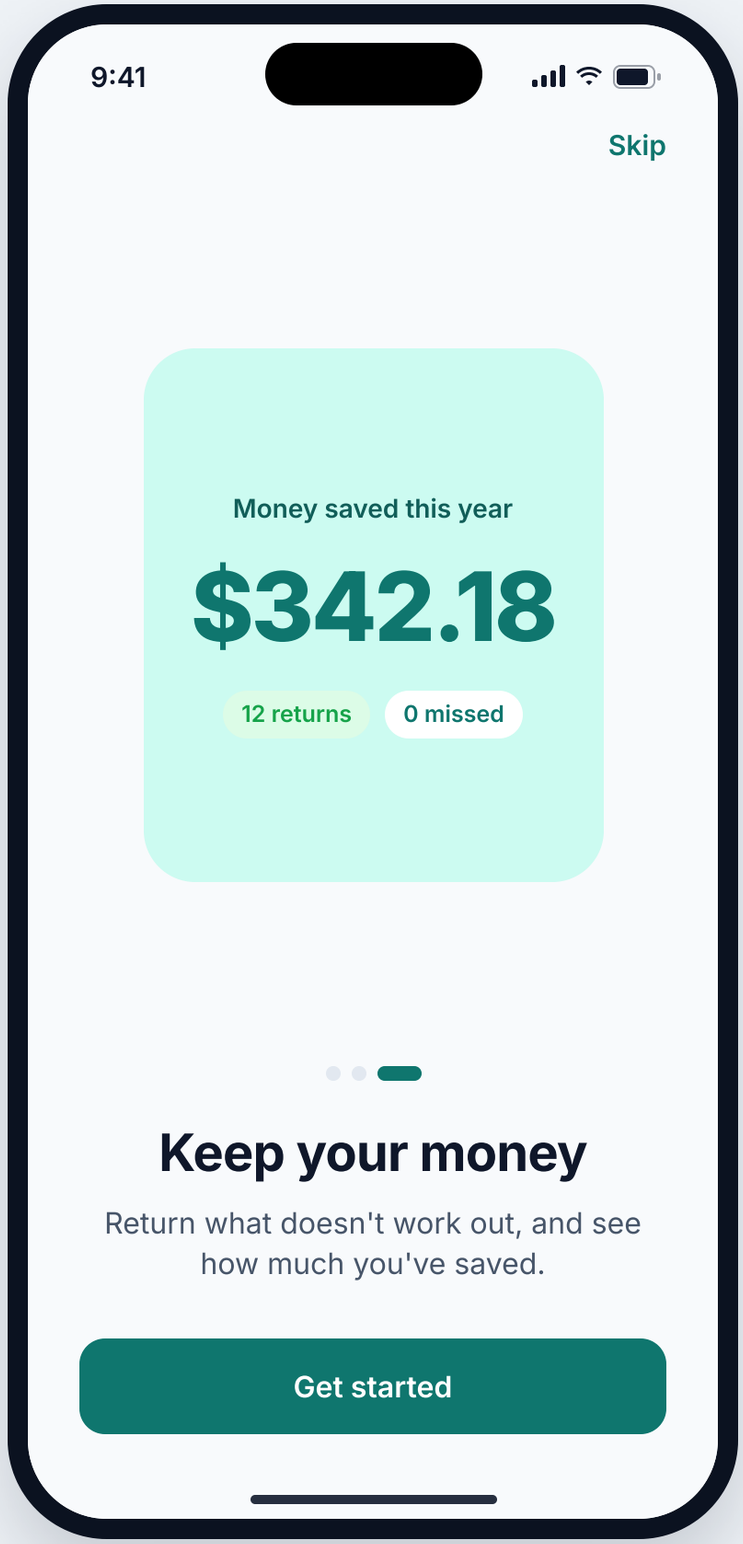

S01 Splash

Logo on teal while the saved login loads. Android 12+ shows the same icon and colour.

S02 Onboarding · 1 of 3

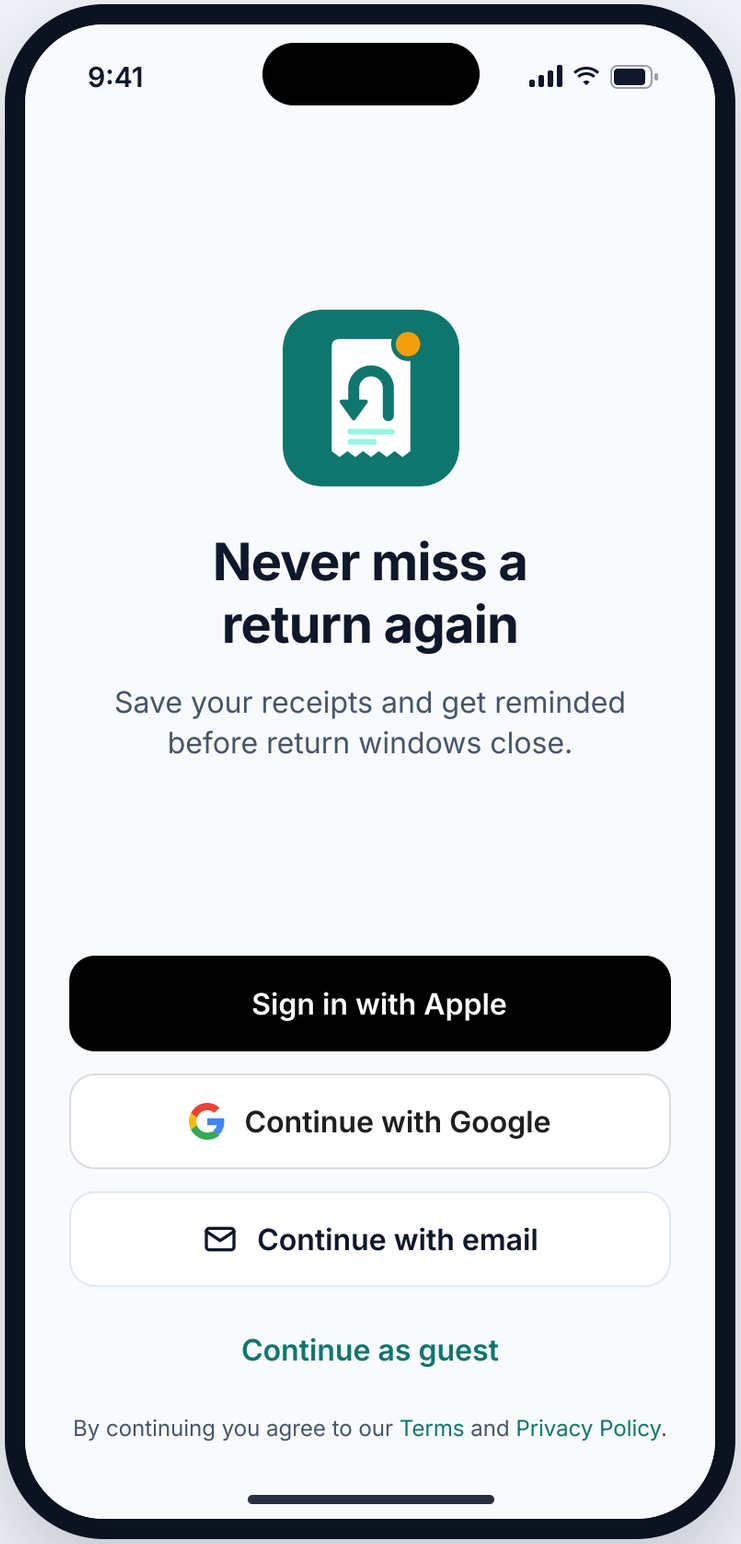

Shown on first launch only. Skip is always visible. Swipe or Next moves between cards.

S02 Onboarding · 3 of 3

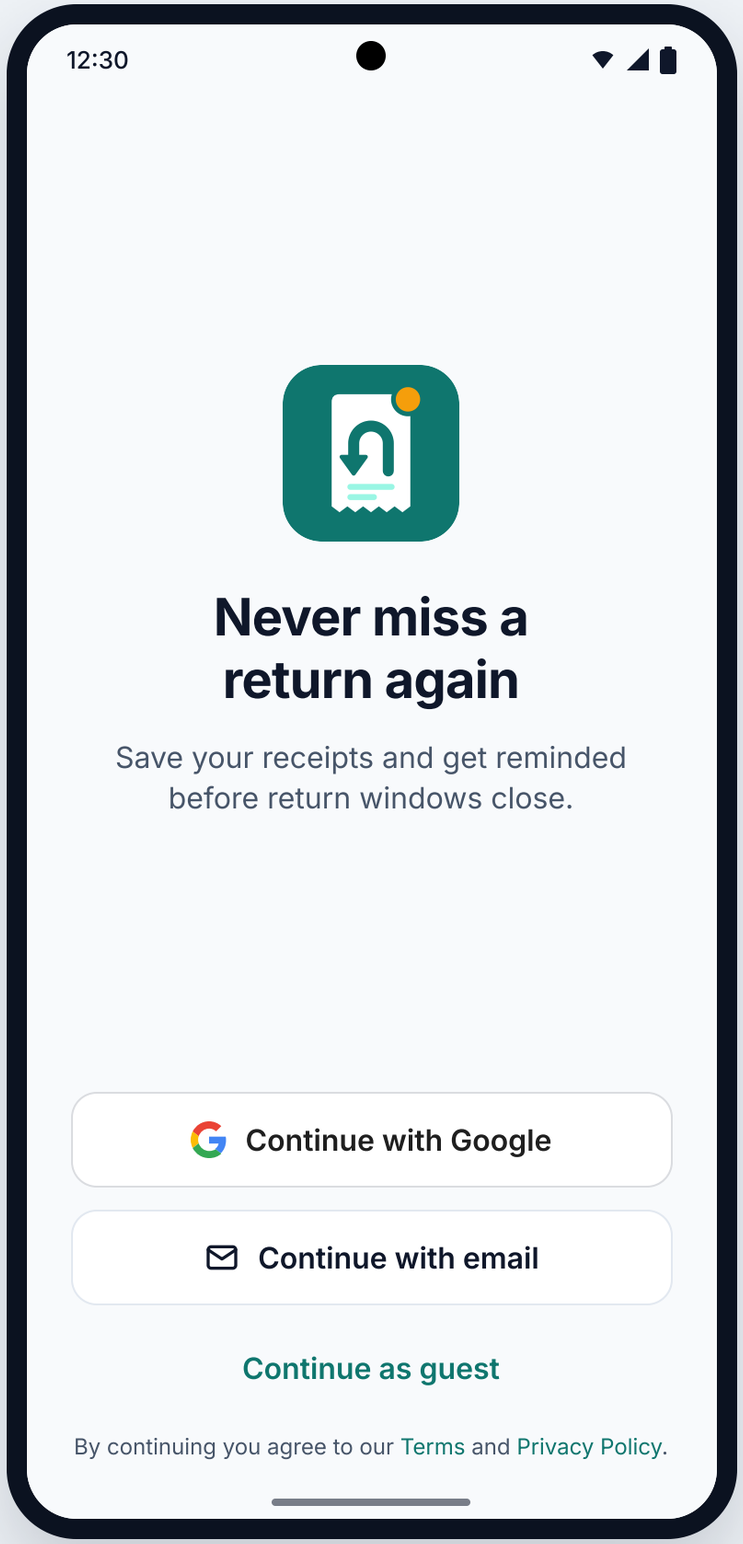

"Get started" opens Welcome. Card 2 ("We remember the deadline") uses the same layout with the reminder illustration.

Welcome on each platform

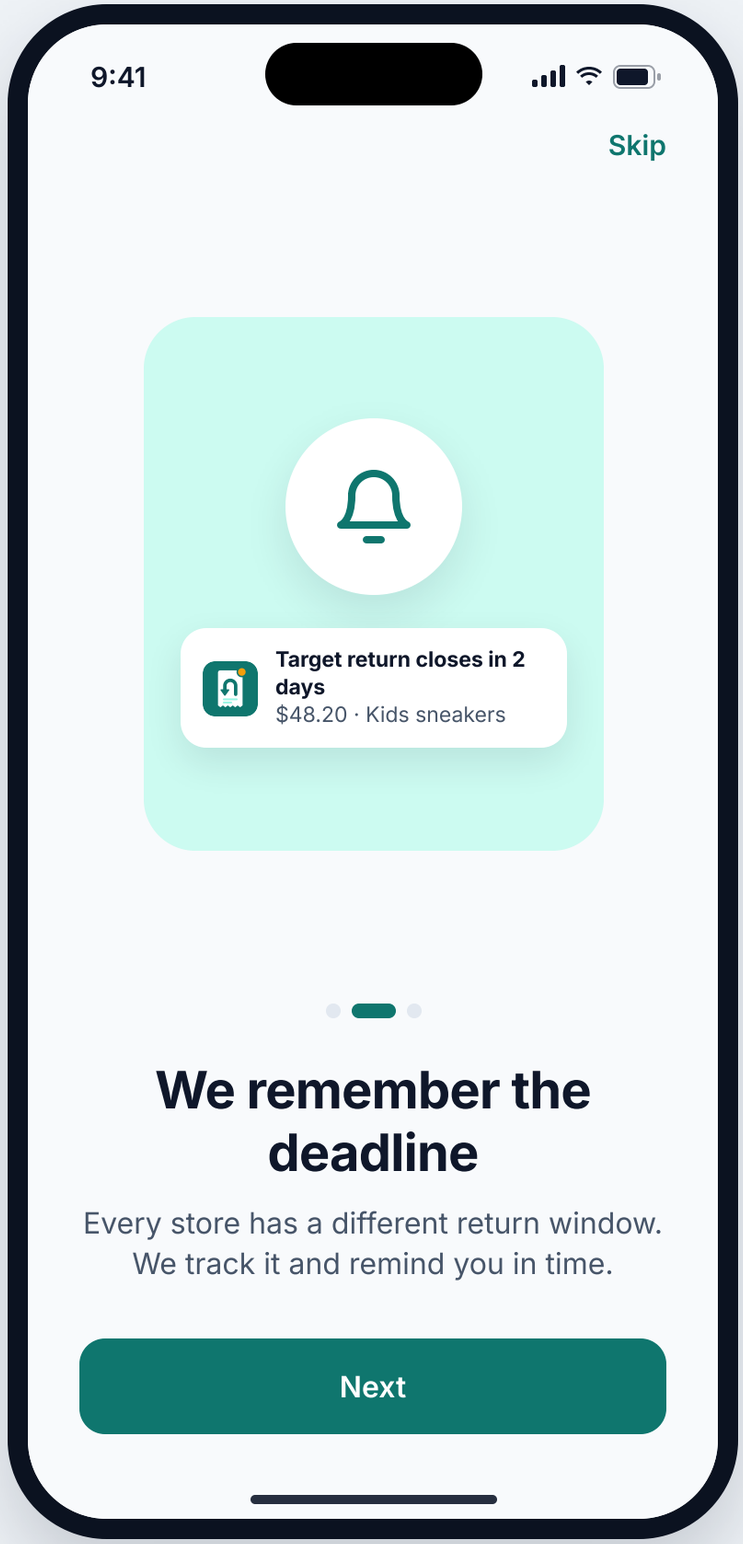

S03 Welcome iOS

Apple first (App Store rule 4.8). Guest uses Firebase anonymous login and can be saved later.

S03 Welcome Android

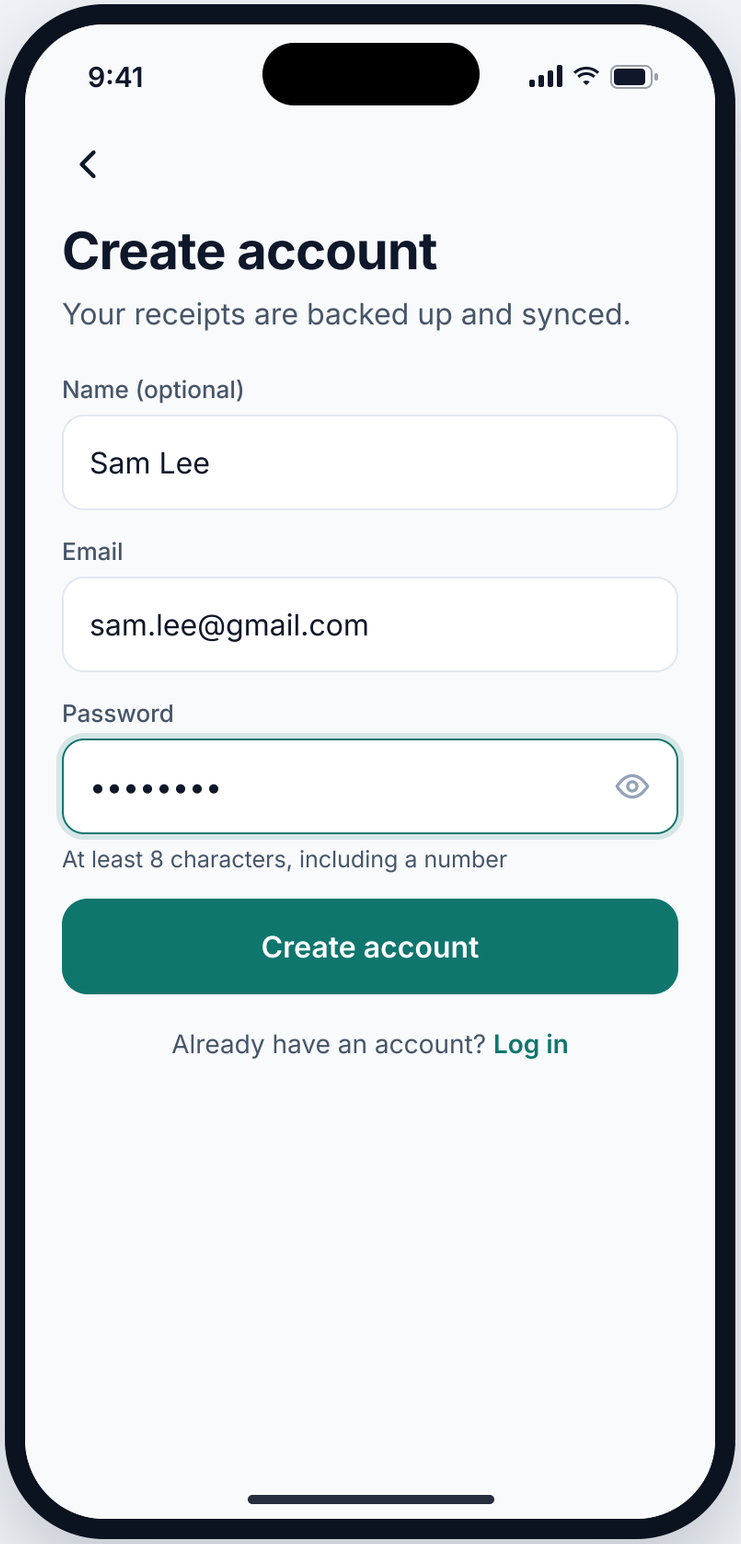

No Apple button on Android. Google first, then email and guest. Same spacing and type as iOS.

S02 Onboarding · 2 of 3

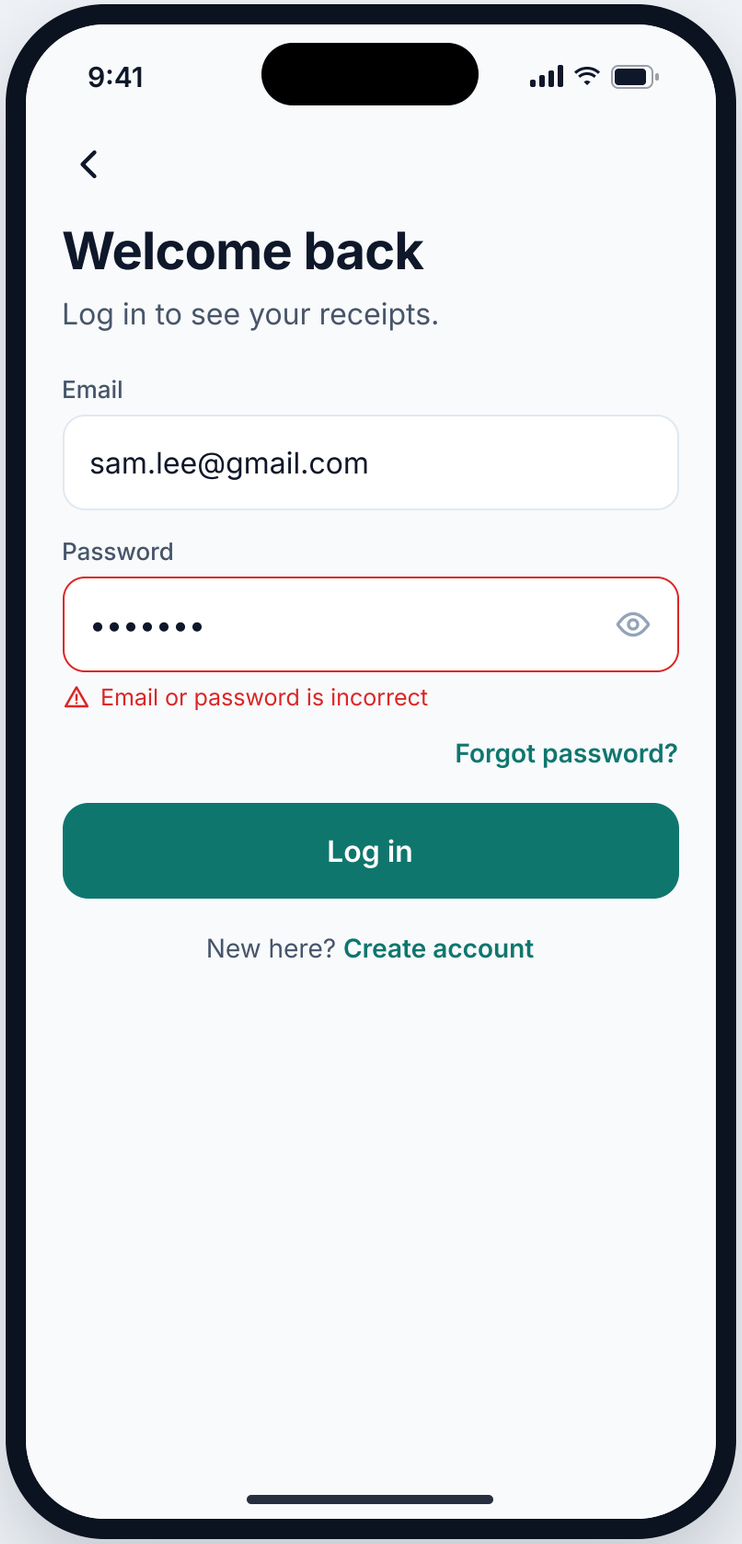

Shown for completeness: the middle onboarding card.

Email flows

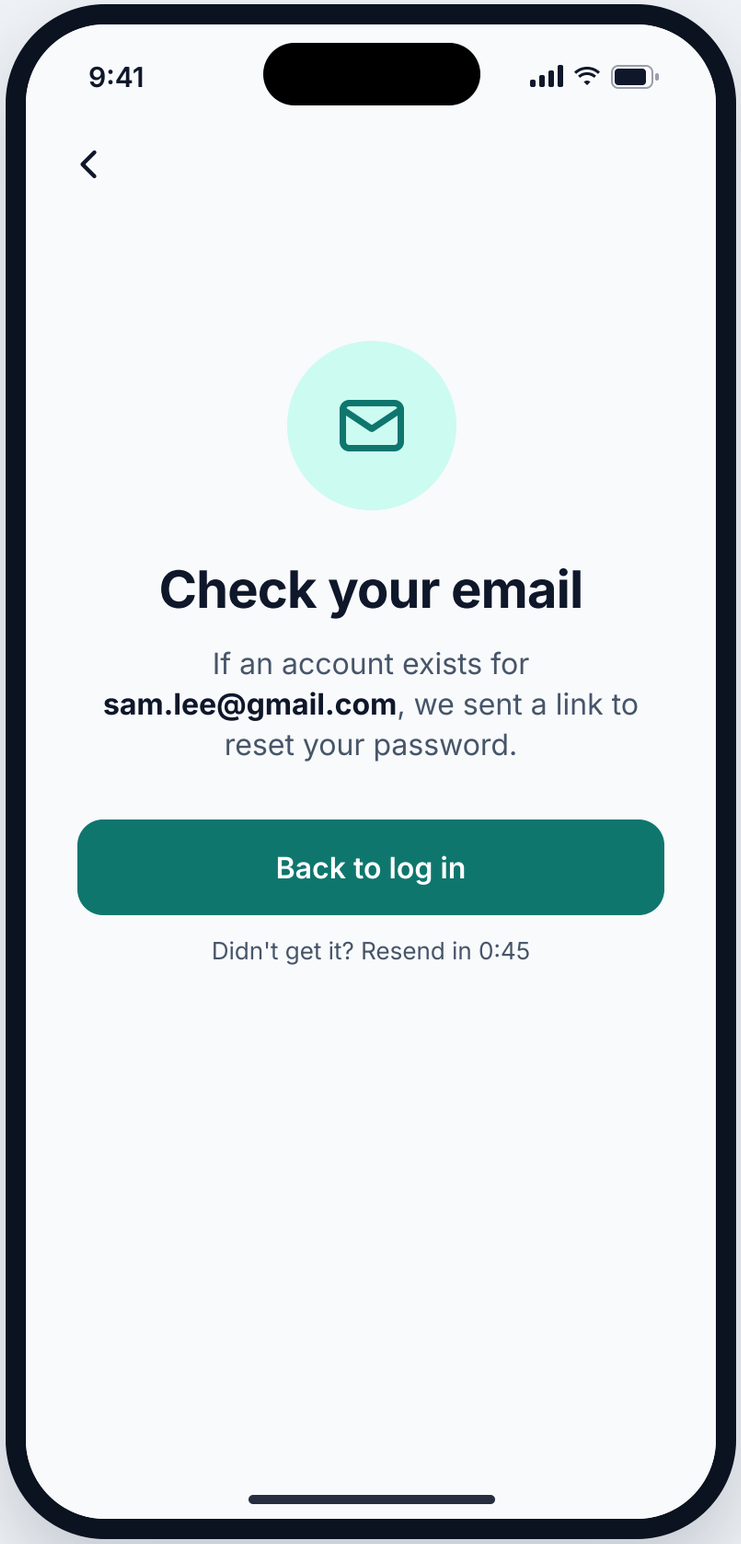

S04 Sign up

Name optional. Password rule shown before the user makes a mistake. Show/hide eye on the password.

S05 Log in · error state

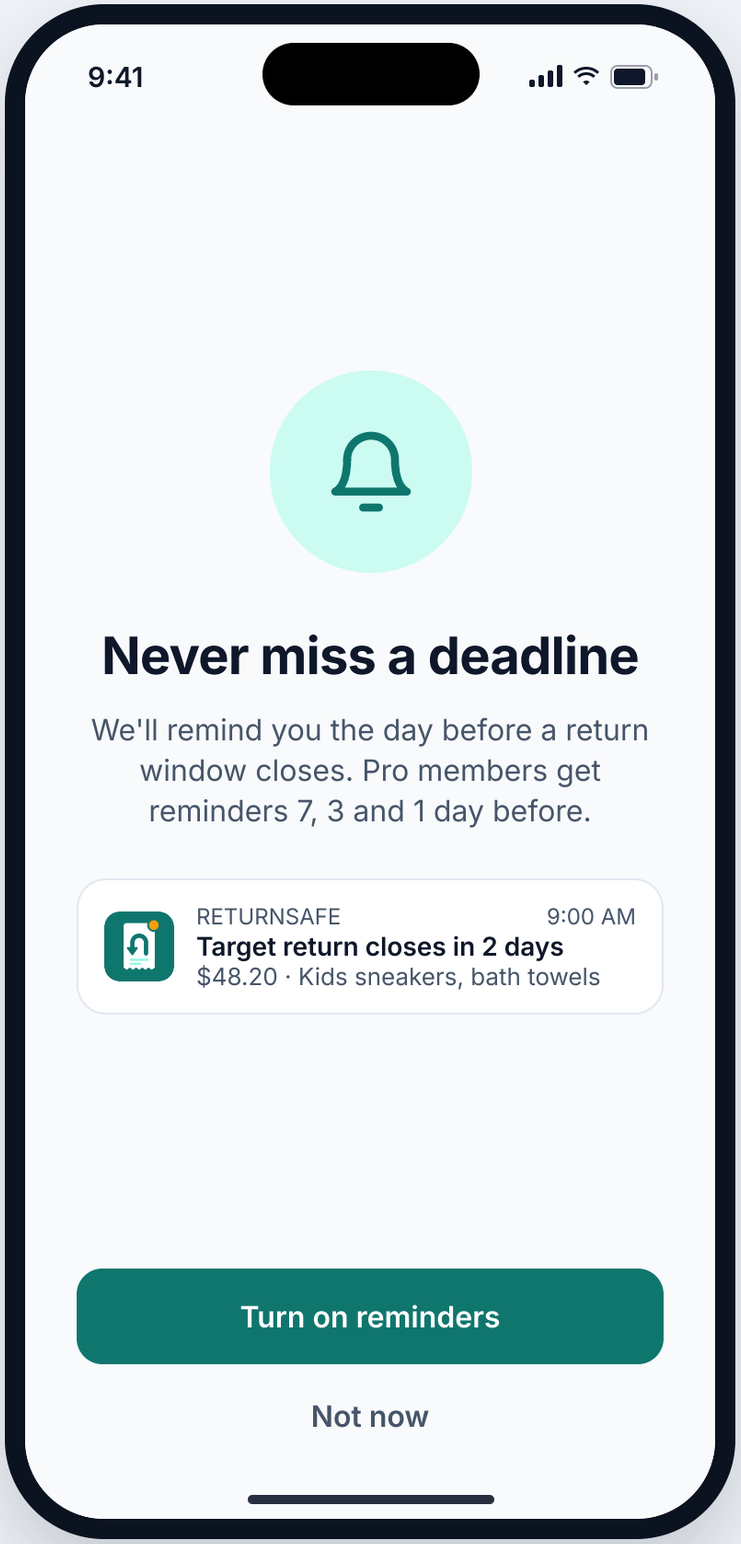

One generic error for a wrong email or password, so the app never reveals which emails are registered.

S06 Forgot password · sent

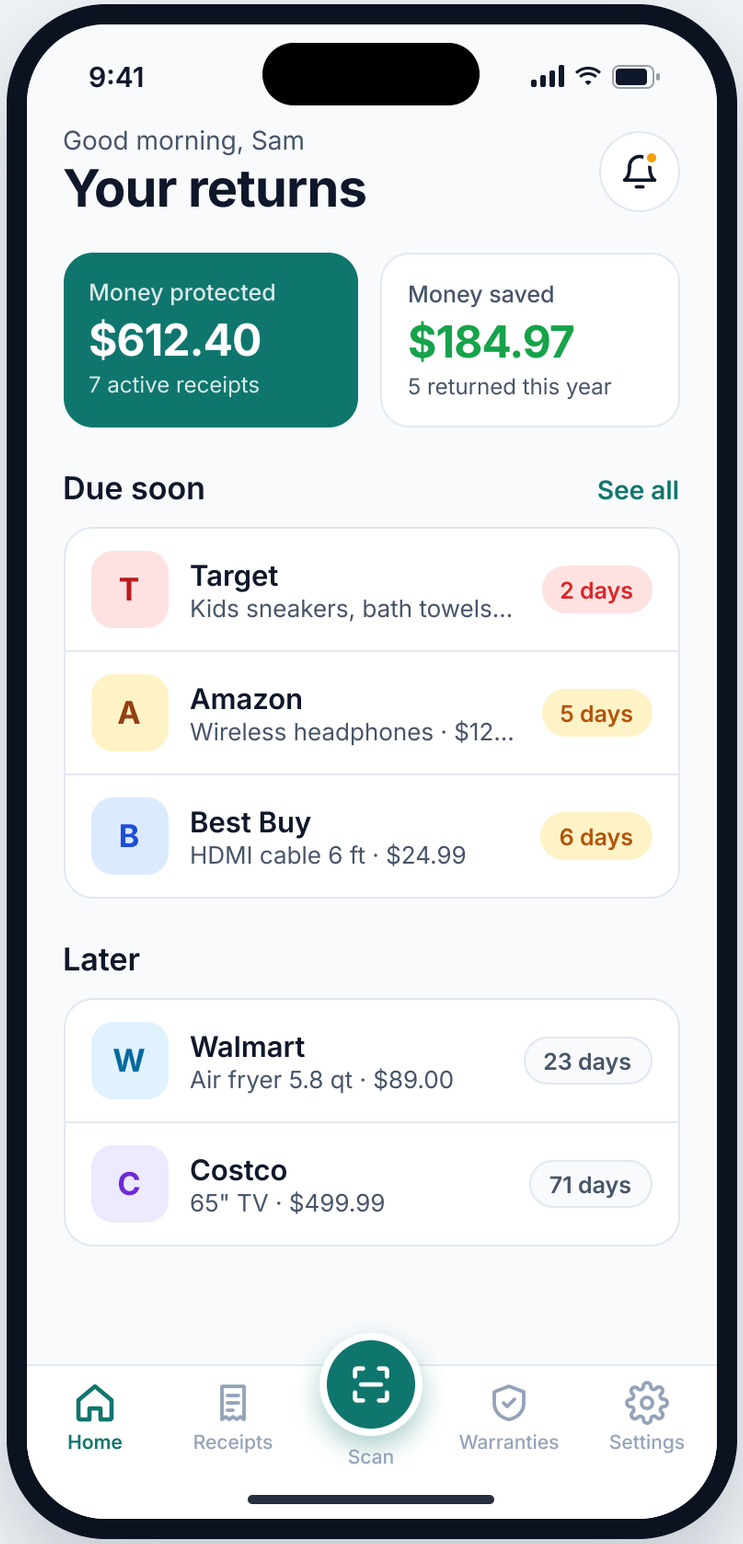

Neutral confirmation for any email. Resend unlocks after 60 seconds.

Permissions and Home

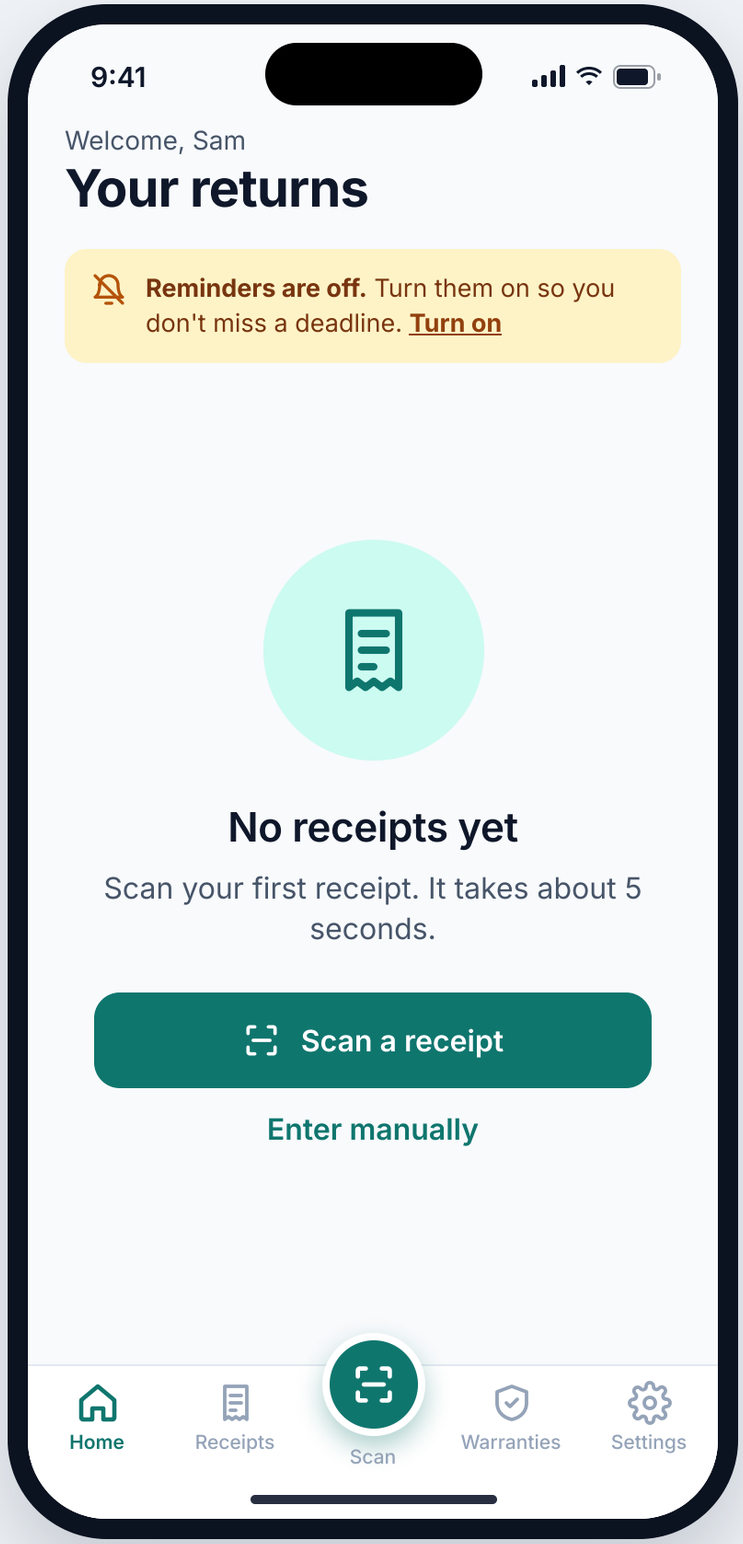

S07 Notification primer

Explains the value first, then triggers the system prompt (iOS, Android 13+). "Not now" never blocks the app.

S08 Home

Money protected and saved up top. Due soon sorted by days left. Raised Scan button in the centre of the tab bar.

S08 Home · empty, reminders off

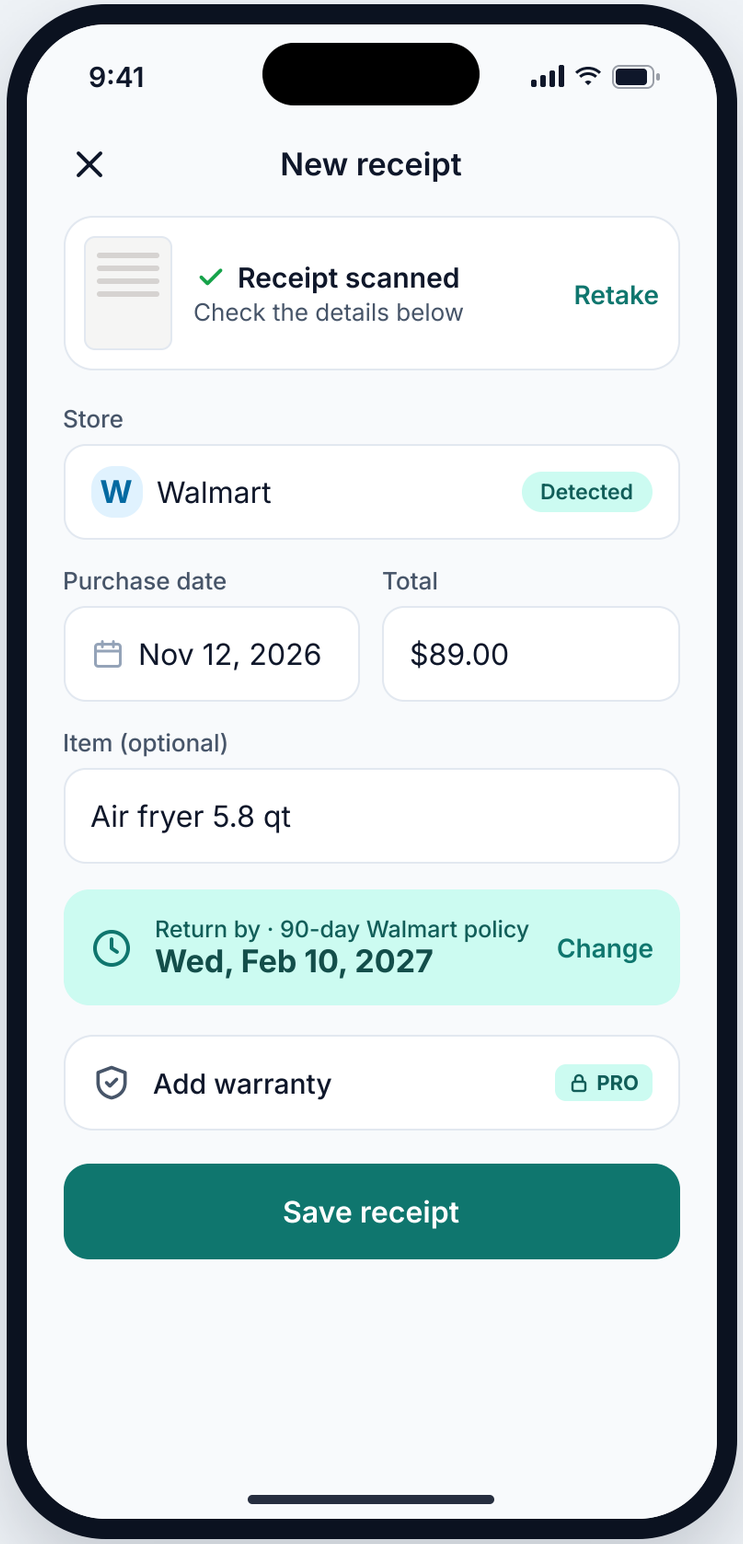

First-run state with a single clear action. Amber banner appears whenever notifications are disabled.

Adding a receipt

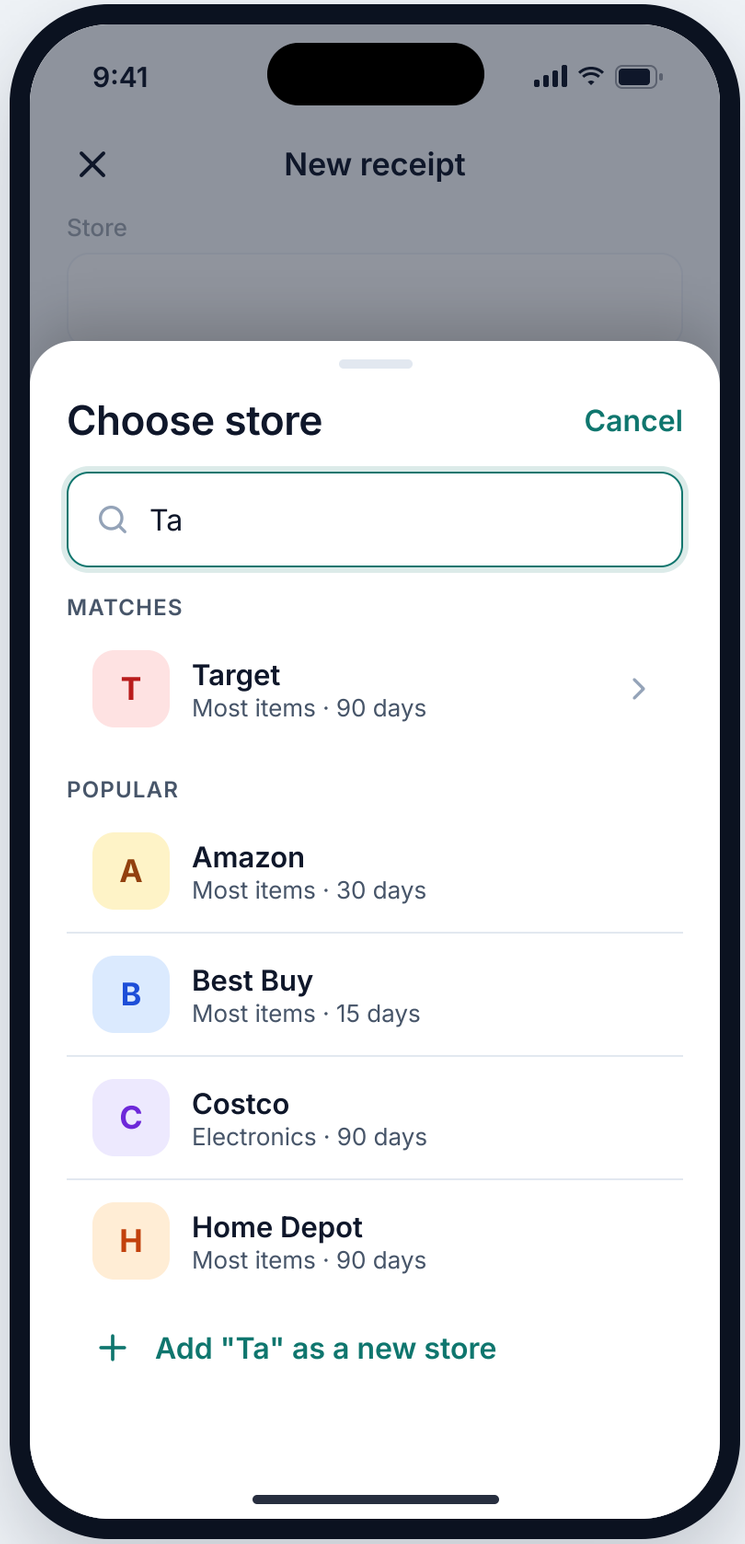

S09 Scan

VisionKit (iOS) and ML Kit (Android) find the receipt edges and capture automatically. "Enter manually" is always one tap away.

S10 Review receipt

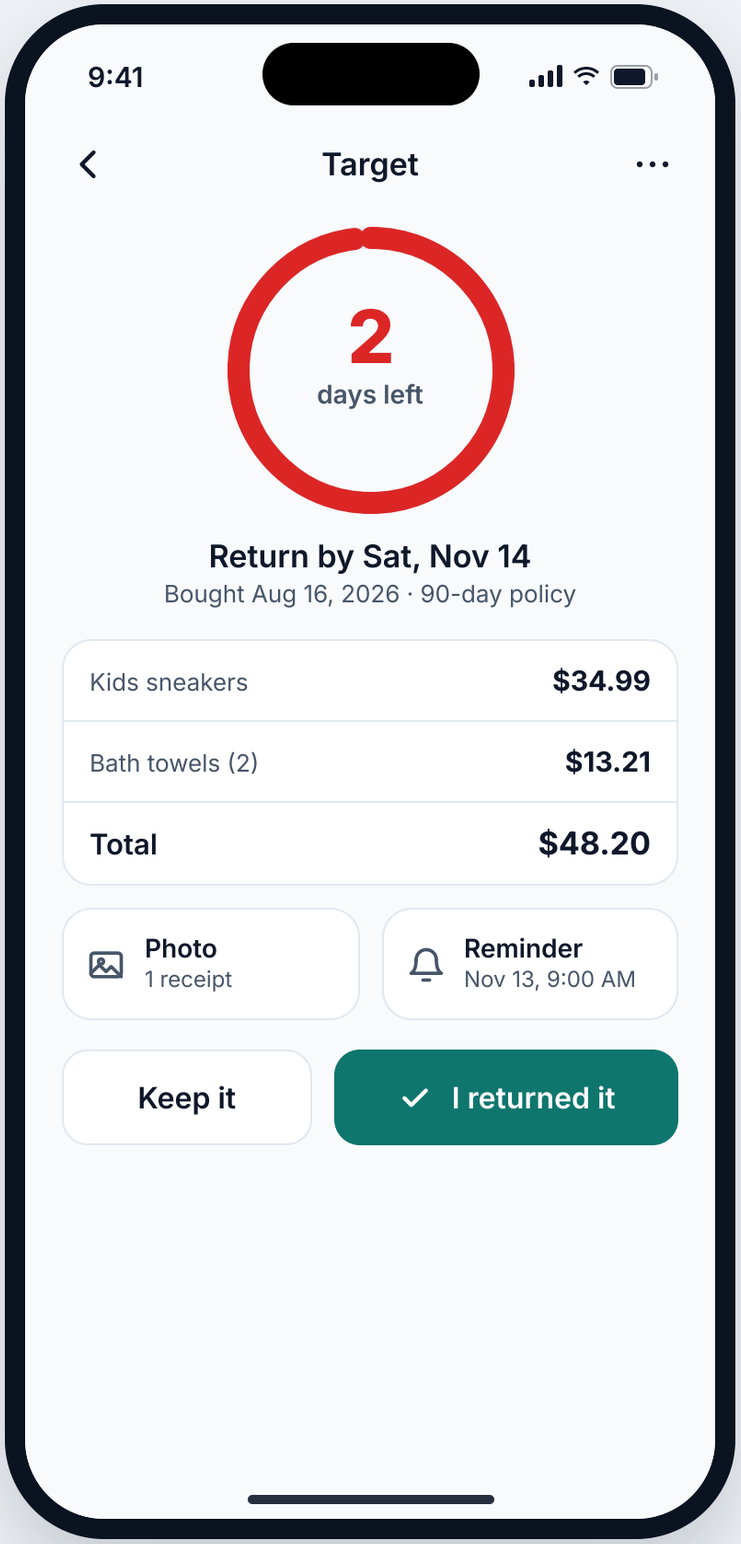

Fields pre-filled from the scan. Deadline computed from the store policy and shown in plain words. Same form is used for manual entry.

S11 Store picker

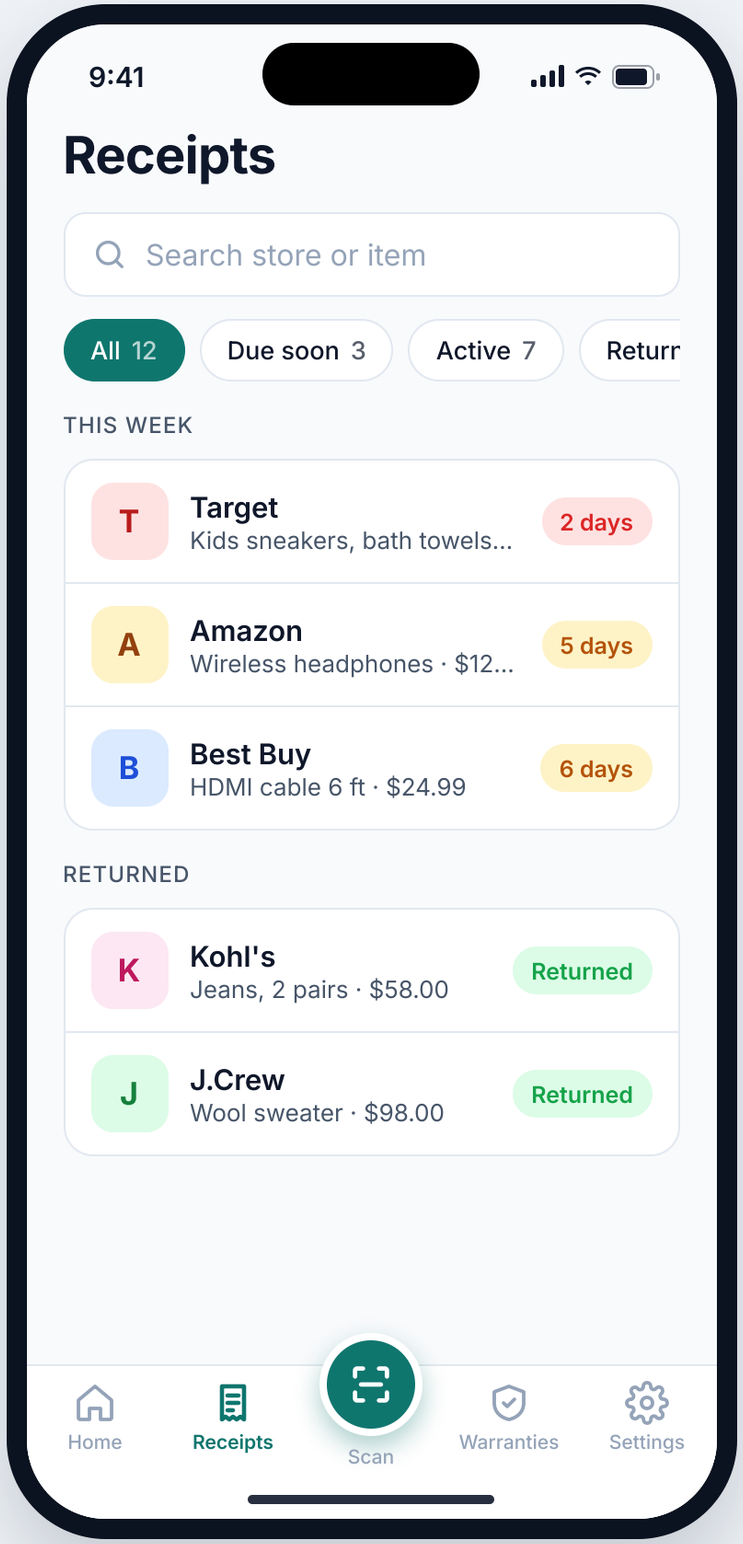

Searchable list of built-in US stores with their return window, or add a custom store and window.

Receipt detail and list

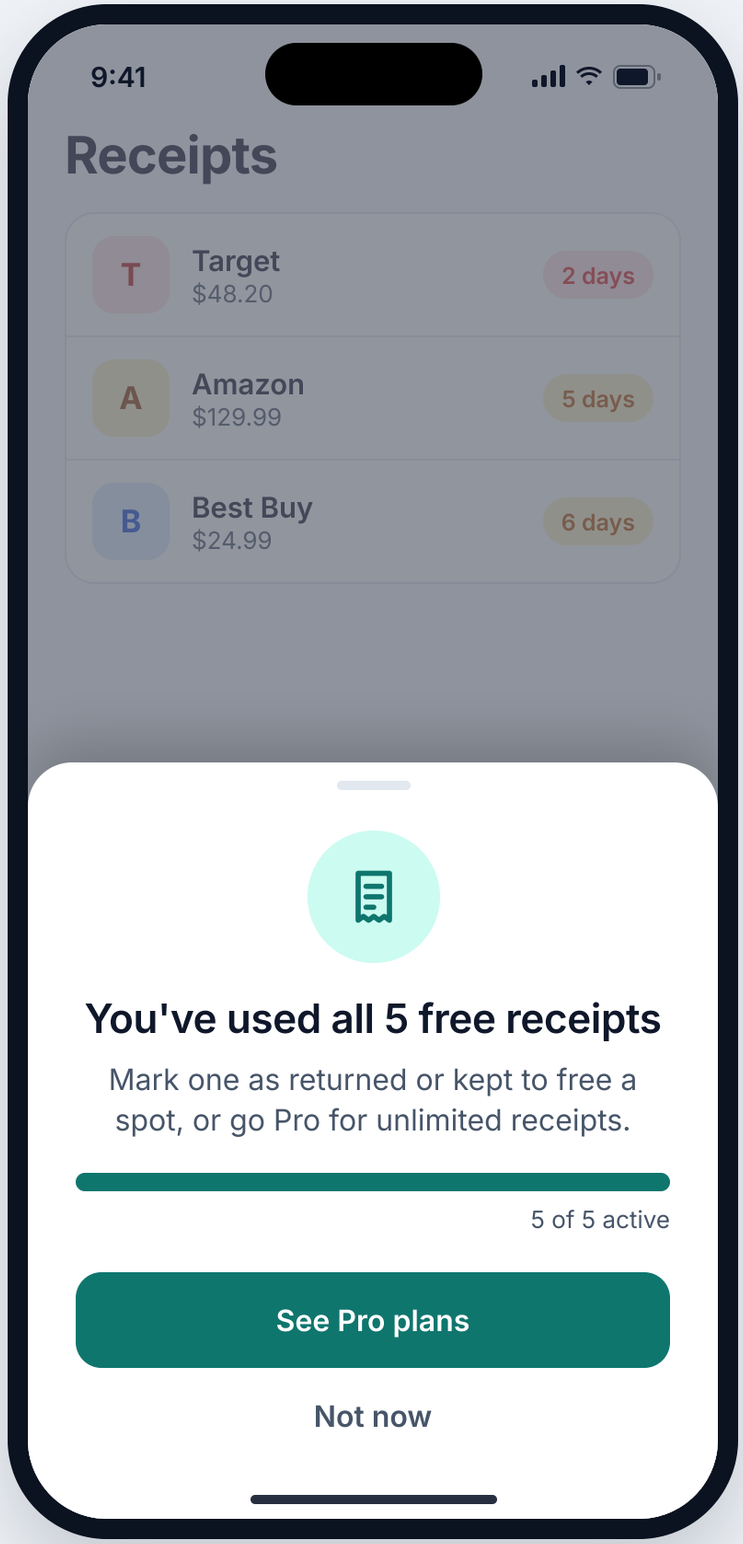

S12 Receipt detail

Countdown ring turns red in the last 2 days. Primary action: "I returned it" (adds to money saved). "Keep it" stops reminders.

S13 Receipts

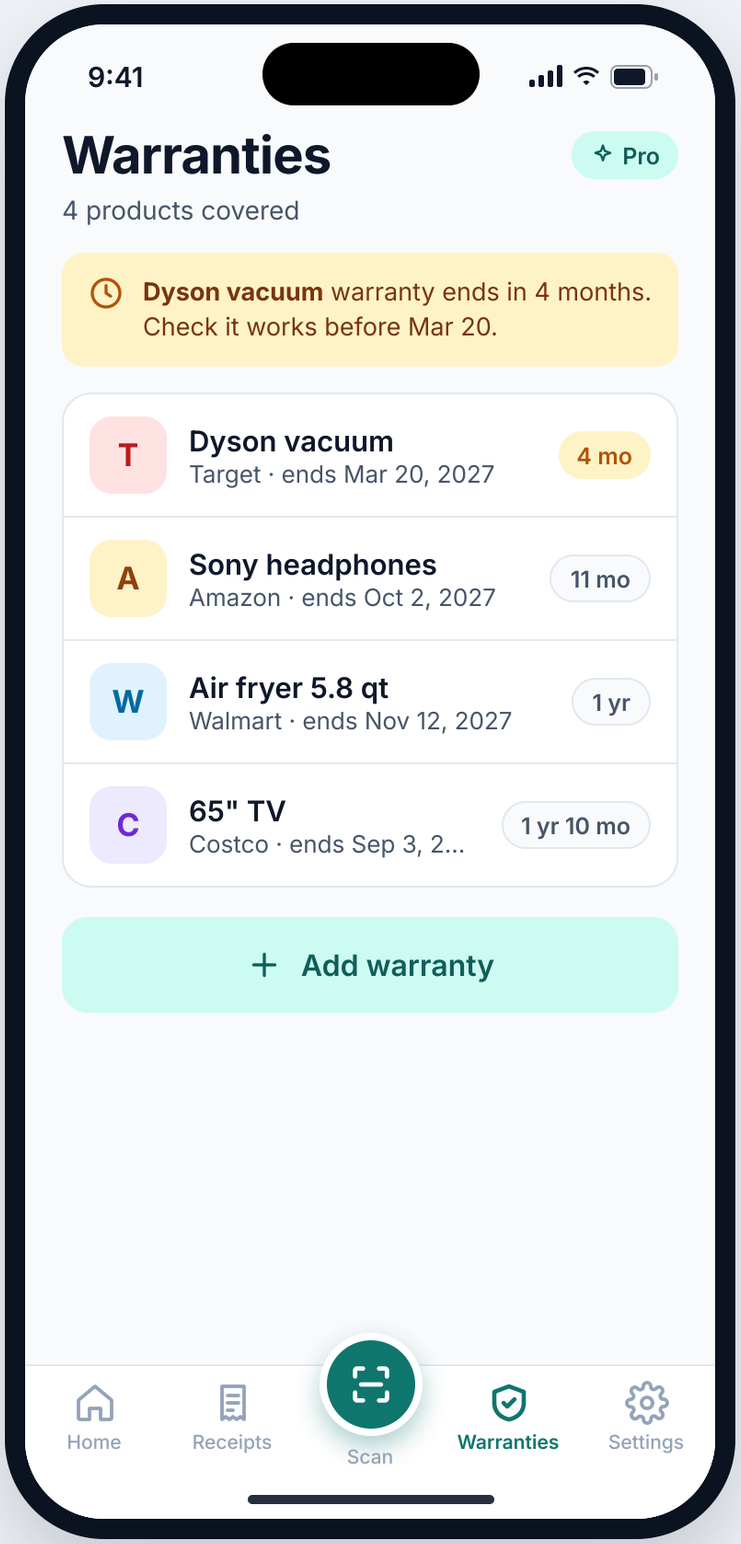

Search by store or item. Filter chips with counts. Grouped by urgency, returned items lower down.

S13 Free limit reached

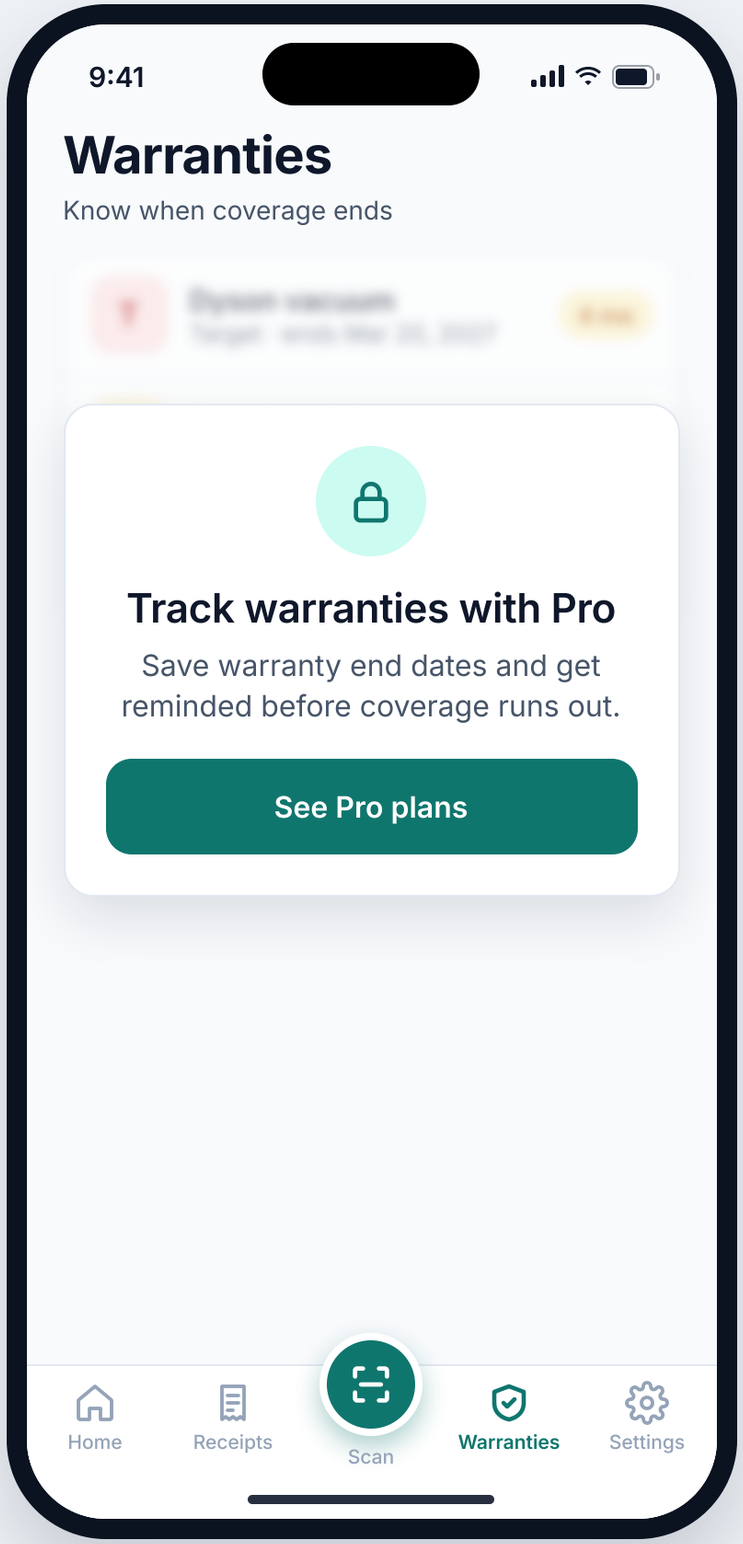

Shown when a Free user tries to add a 6th active receipt. Offers a way to stay free, not only the upgrade.

Warranties and paywall

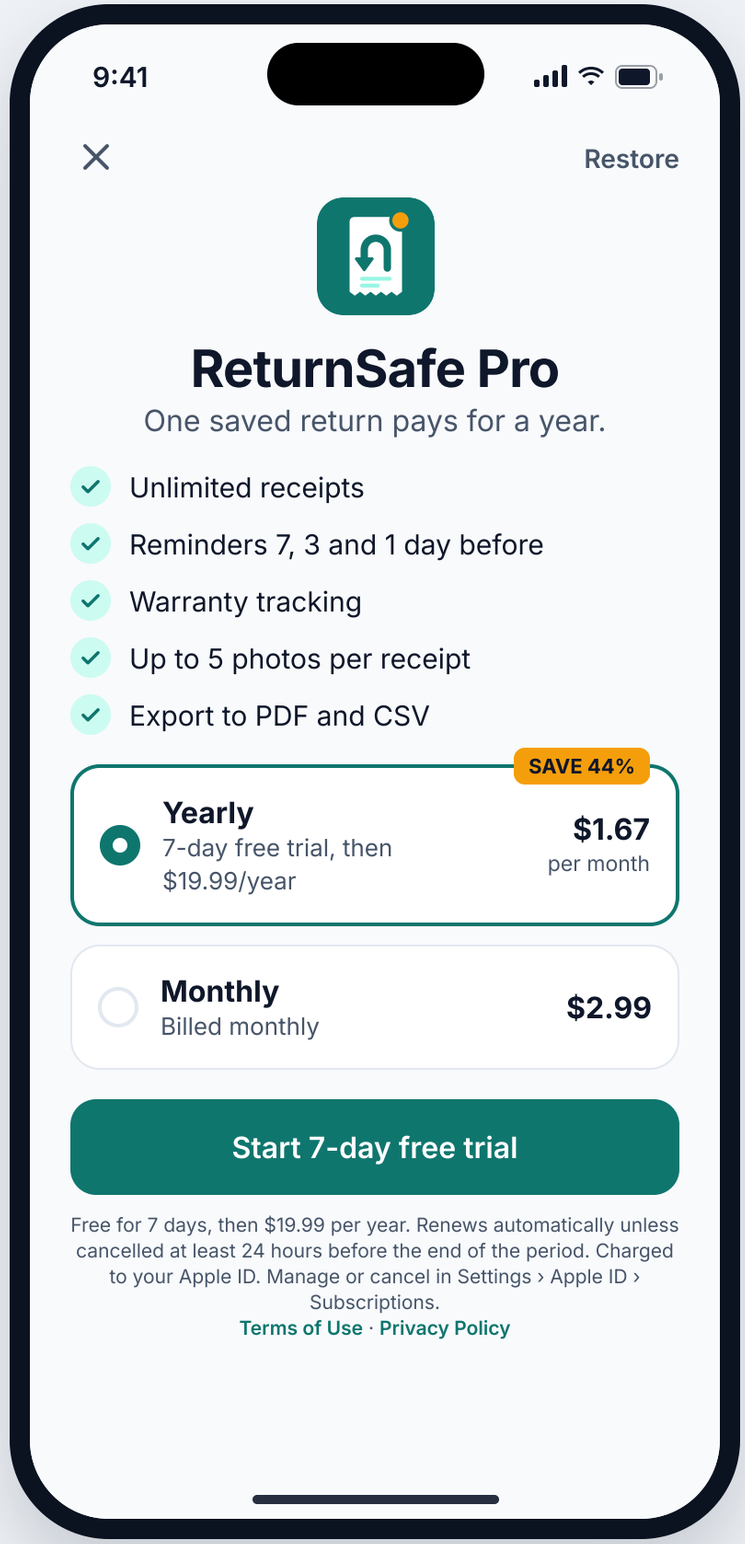

S14 Warranties · Pro

Sorted by end date. An amber banner warns 4 months before coverage ends.

S14 Warranties · Free

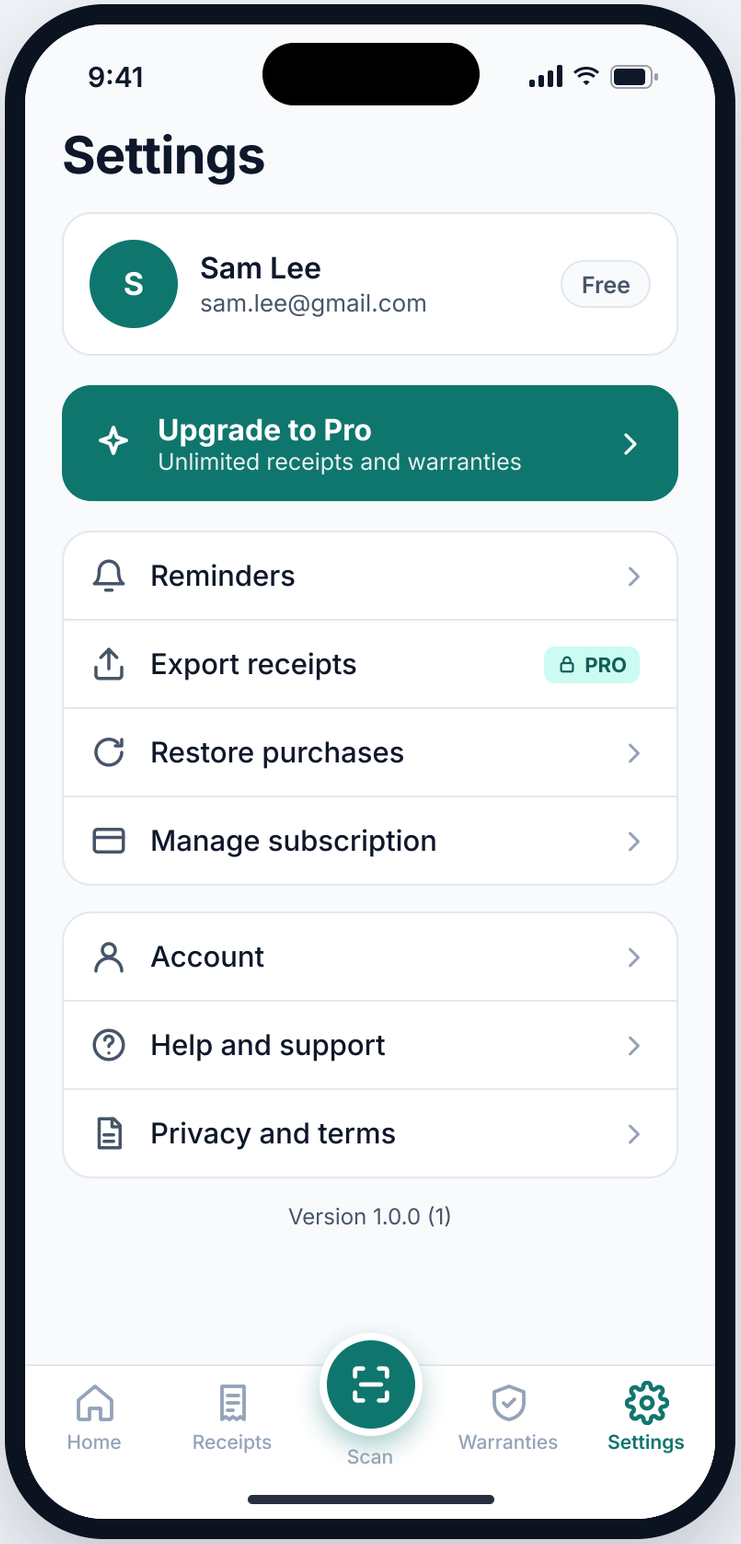

Blurred preview with a clear upgrade card.

S15 Paywall iOS

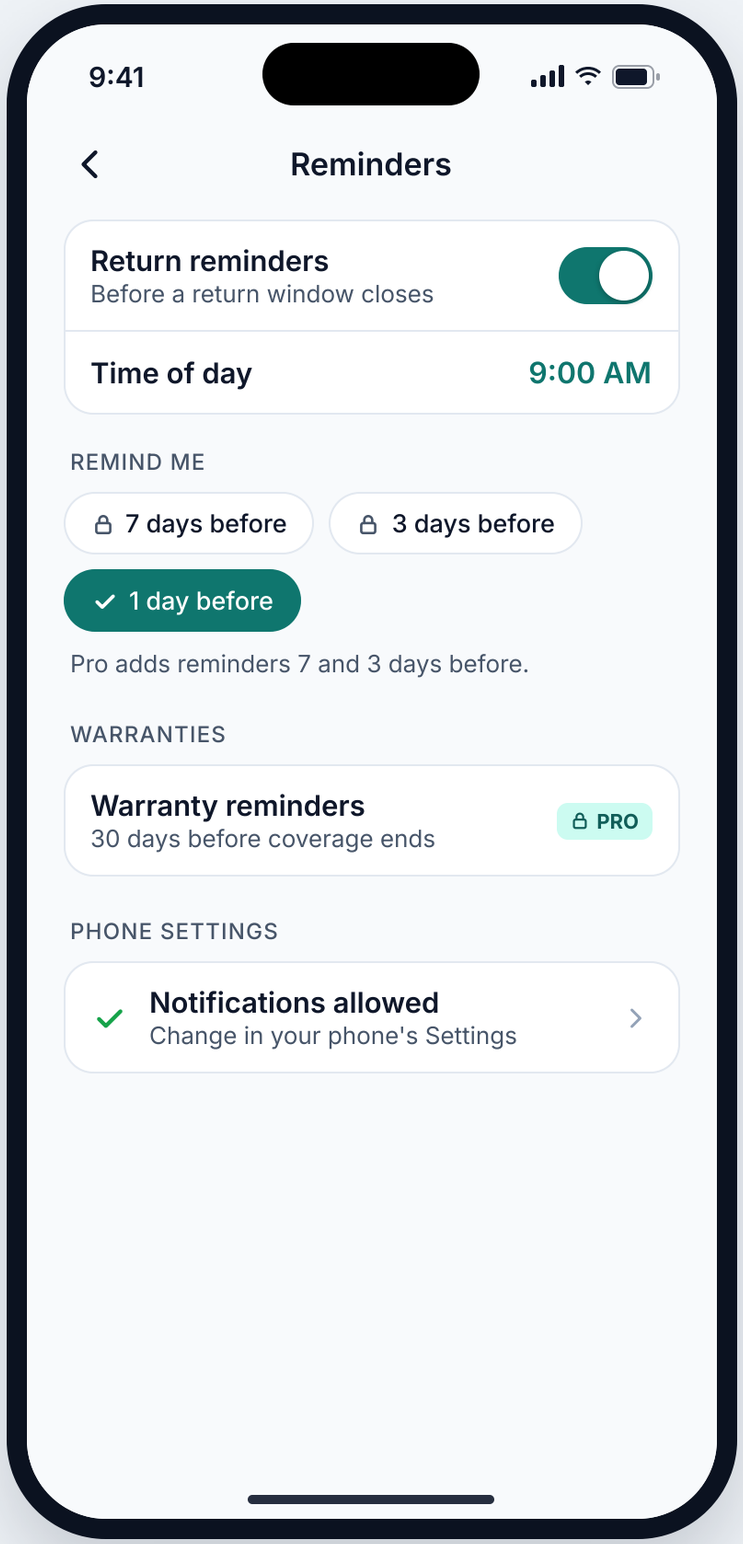

Yearly selected by default with the trial. Price, period, renewal and cancel text, Restore, Terms and Privacy are all visible, as both stores require.

Settings and account

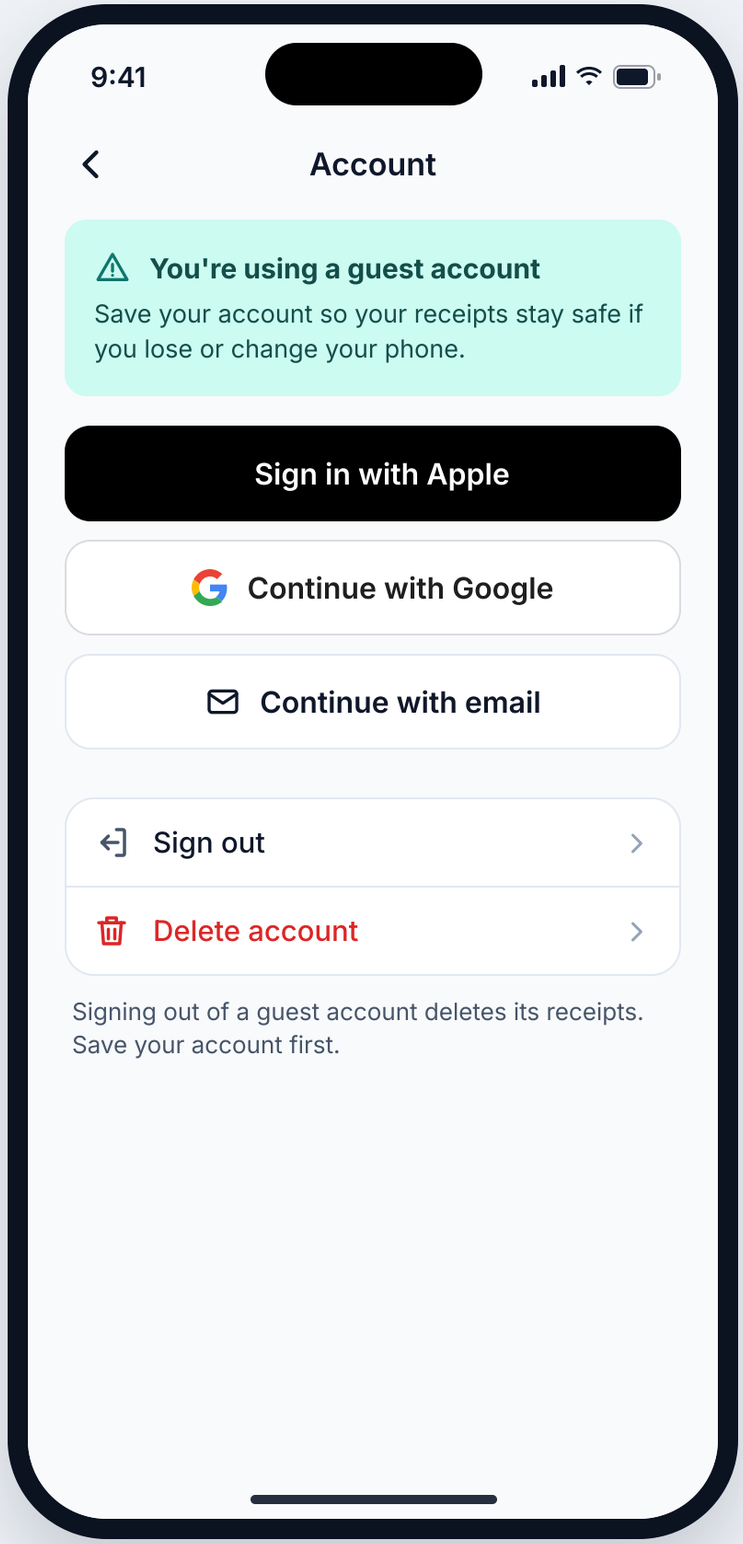

S16 Settings

Account card, upgrade banner for Free users, then grouped rows.

S17 Reminder settings

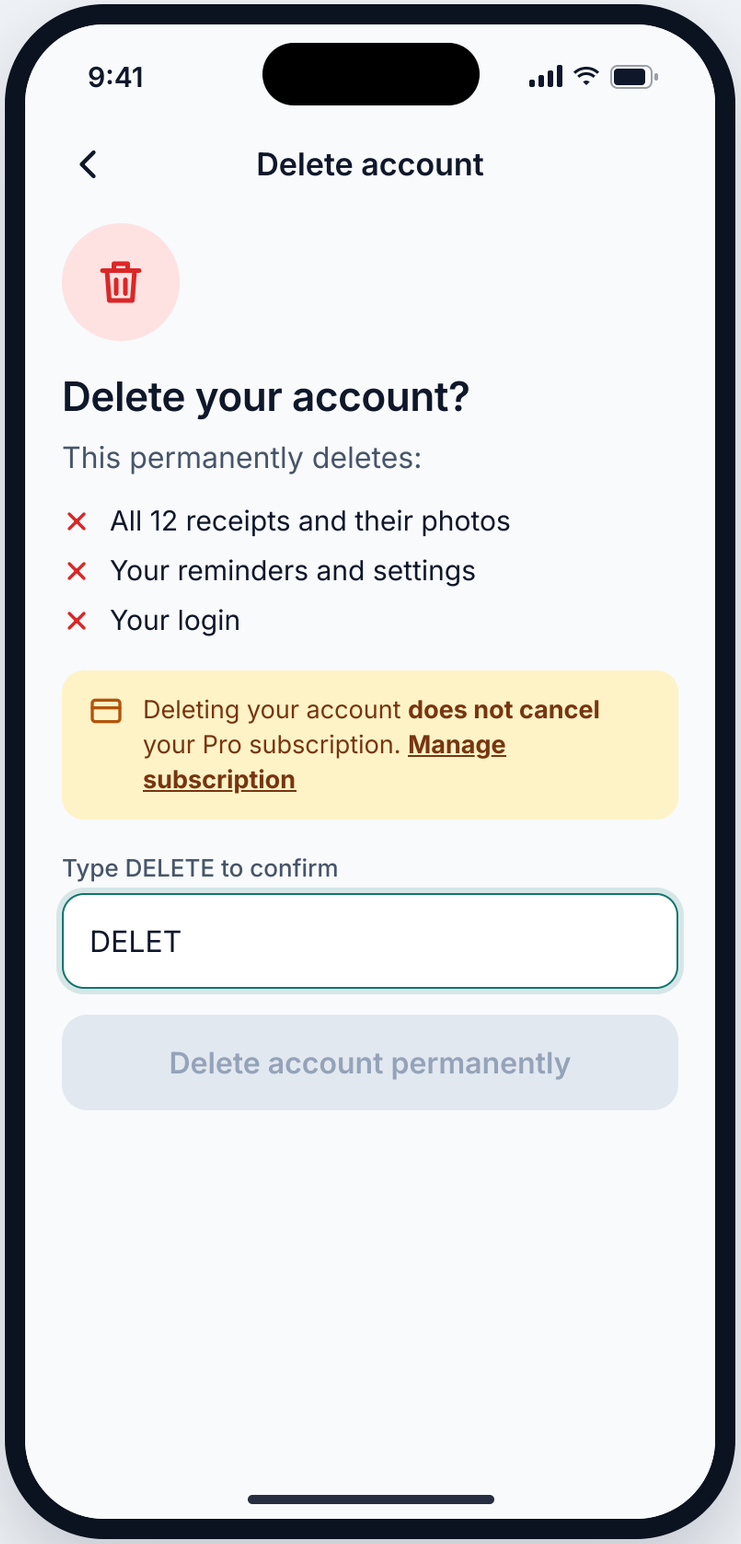

Time of day for all reminders. Pro-only options show a lock and open the paywall.

S18 Account · guest

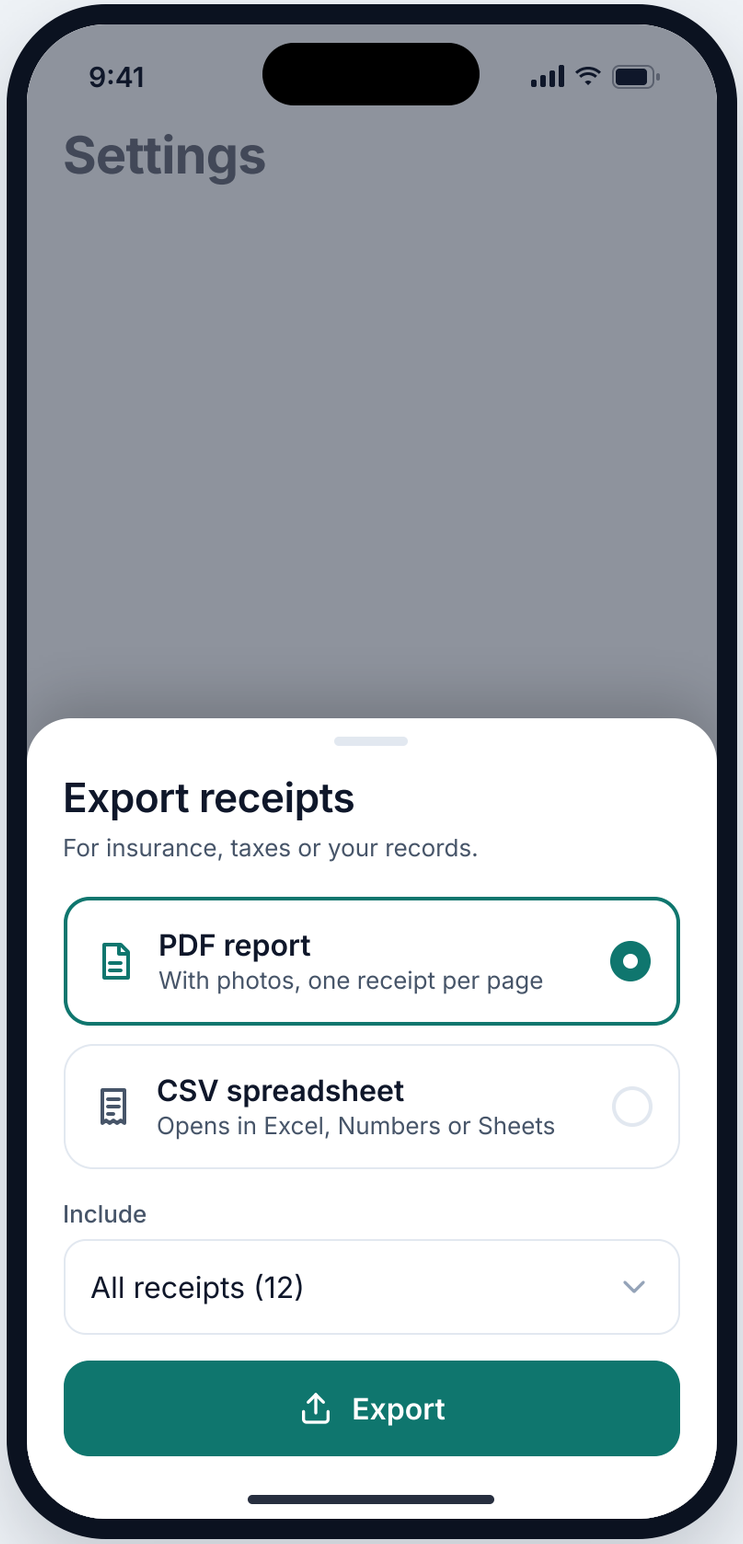

Guests are pushed to save an account before anything is lost. Delete account is always reachable here.

Delete, export and platform details

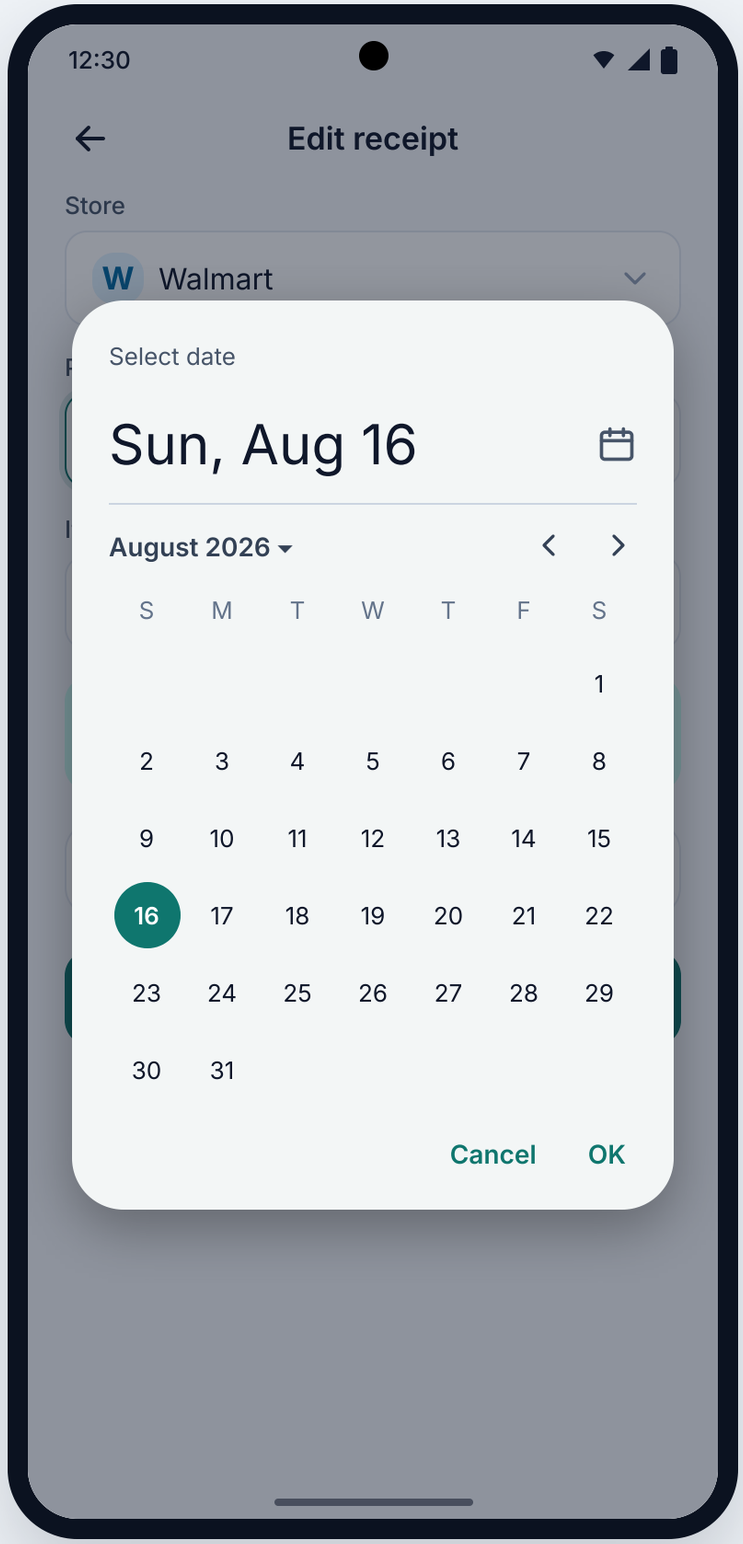

S19 Delete account

Lists exactly what is deleted, warns that the subscription must be cancelled separately, and requires typing DELETE.

S20 Export · Pro

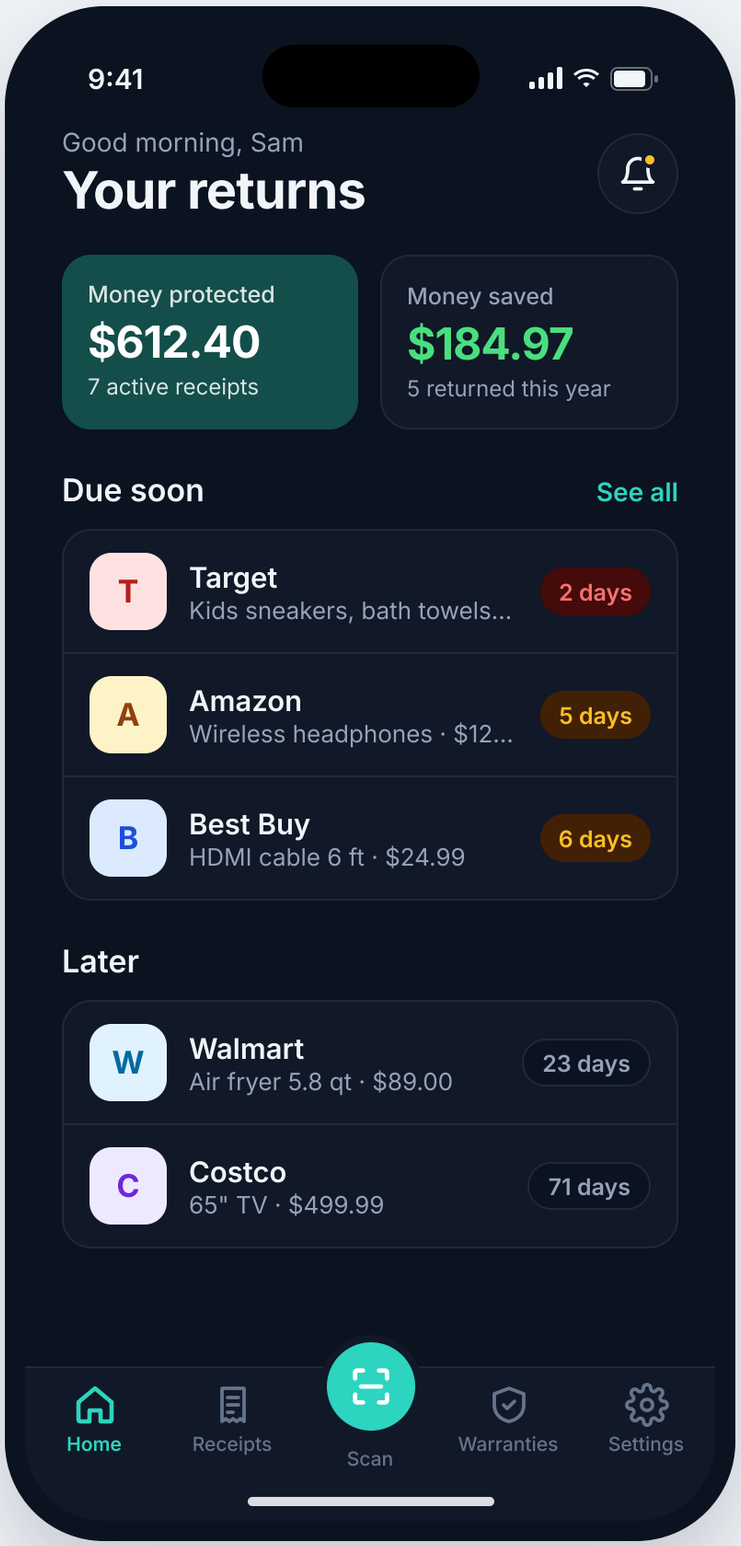

PDF with photos or CSV, shared through the system share sheet.

S21 Edit receipt · date picker Android

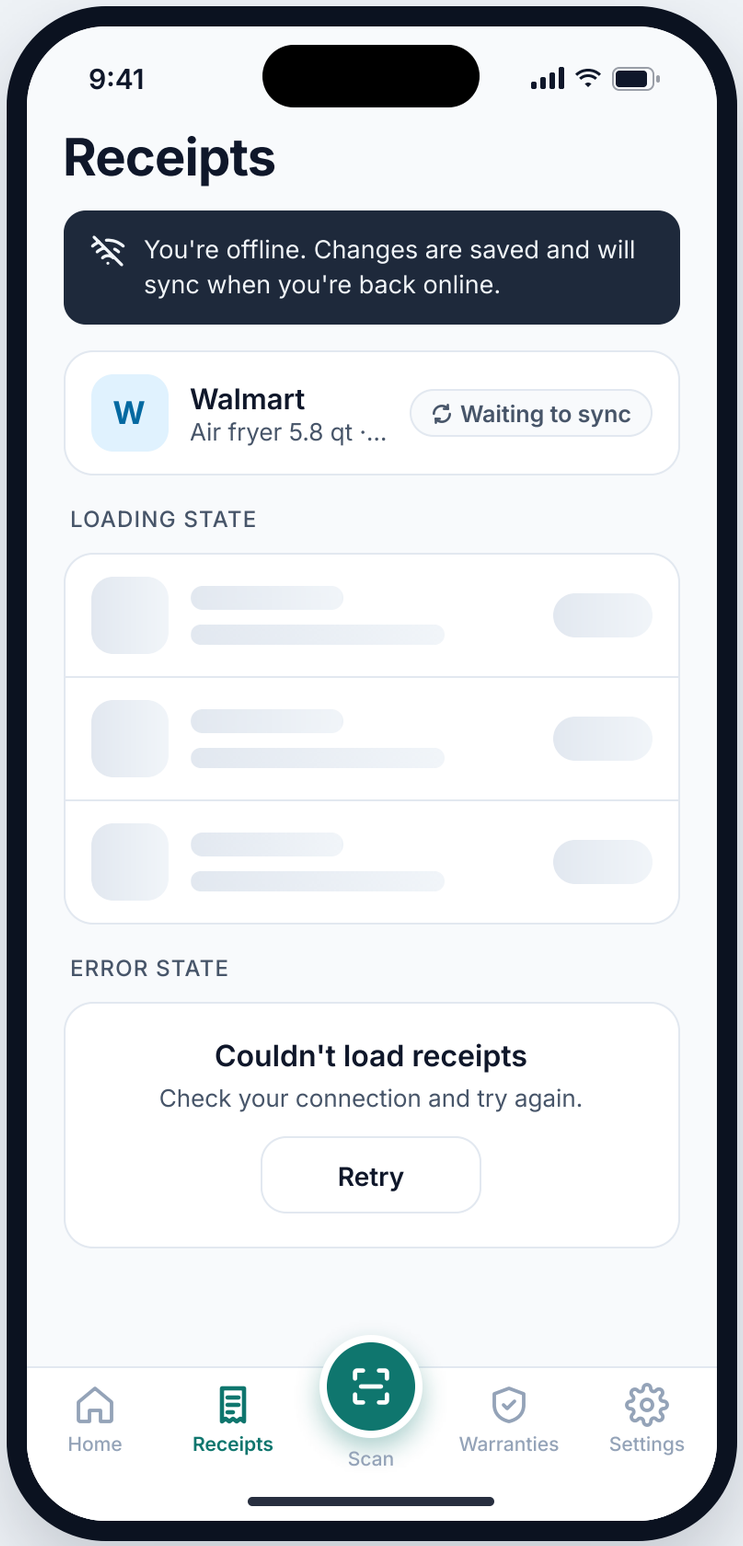

Android uses the Material date dialog; iOS uses an inline calendar in a sheet. The form itself is identical.

Dark mode, offline and notifications

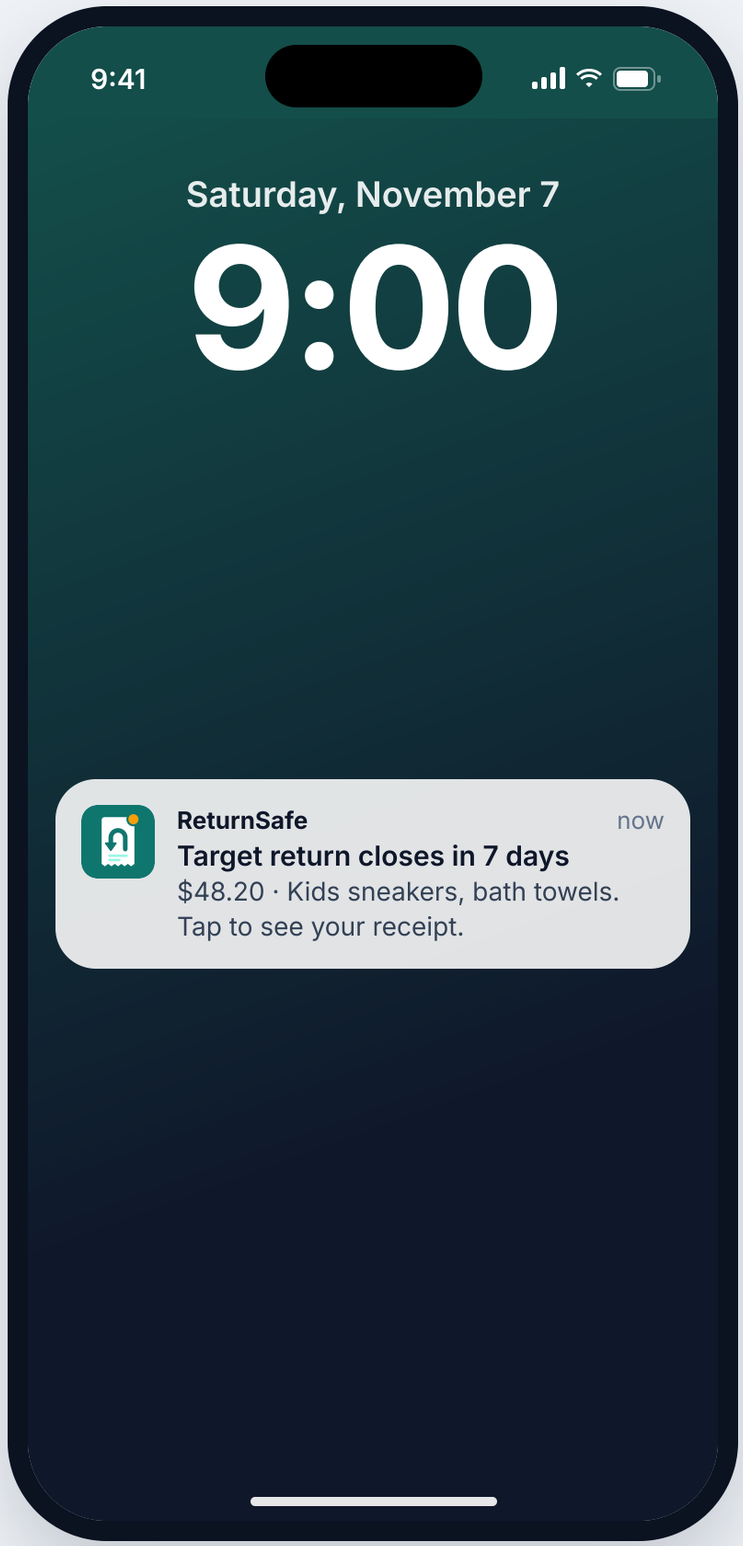

S08 Home · dark mode

Every screen has a dark version from the same tokens. Brand teal lightens to #2DD4BF for contrast.

— Offline, loading and error

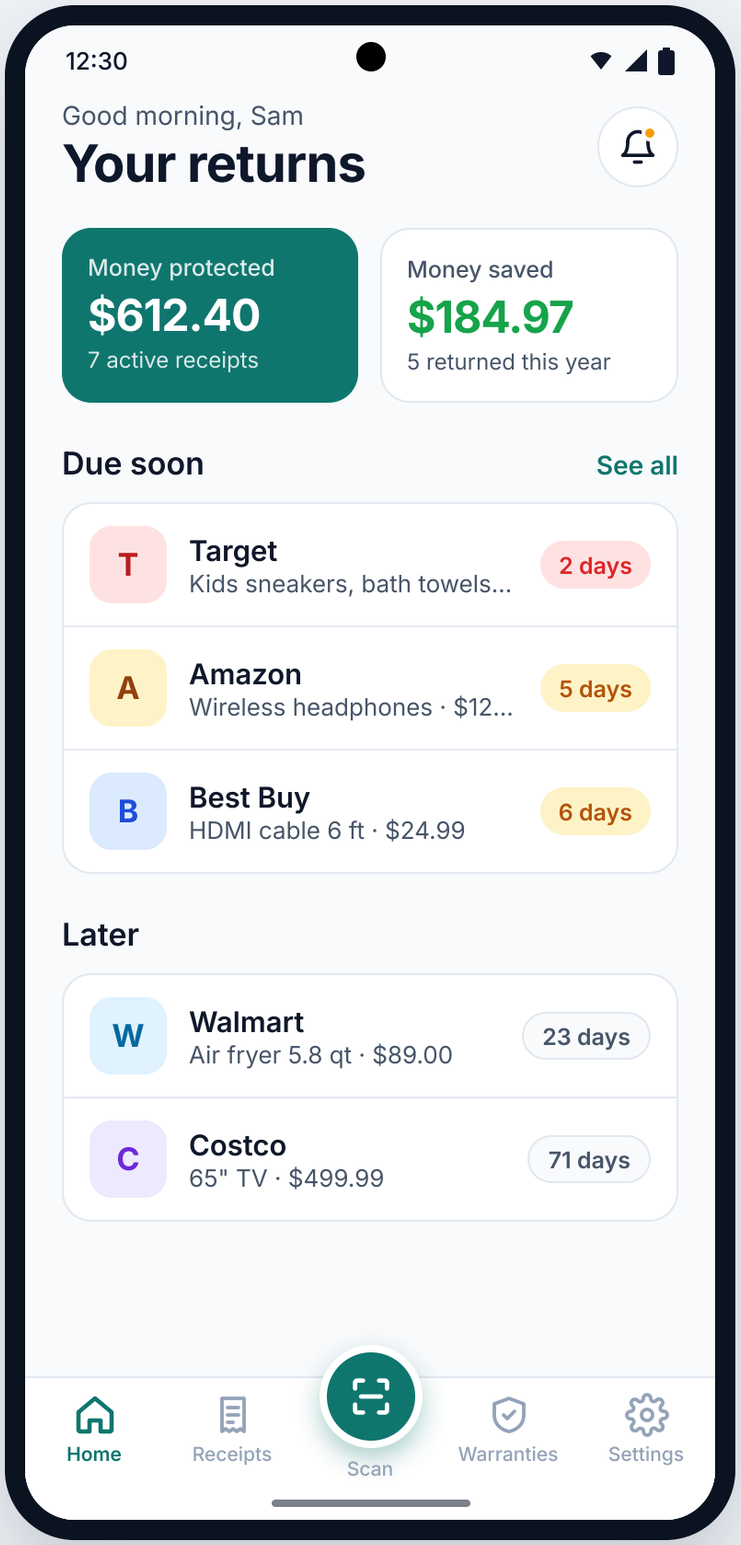

Offline edits are kept and synced later. Skeleton rows while loading. Every error has a Retry.

— Reminder notification

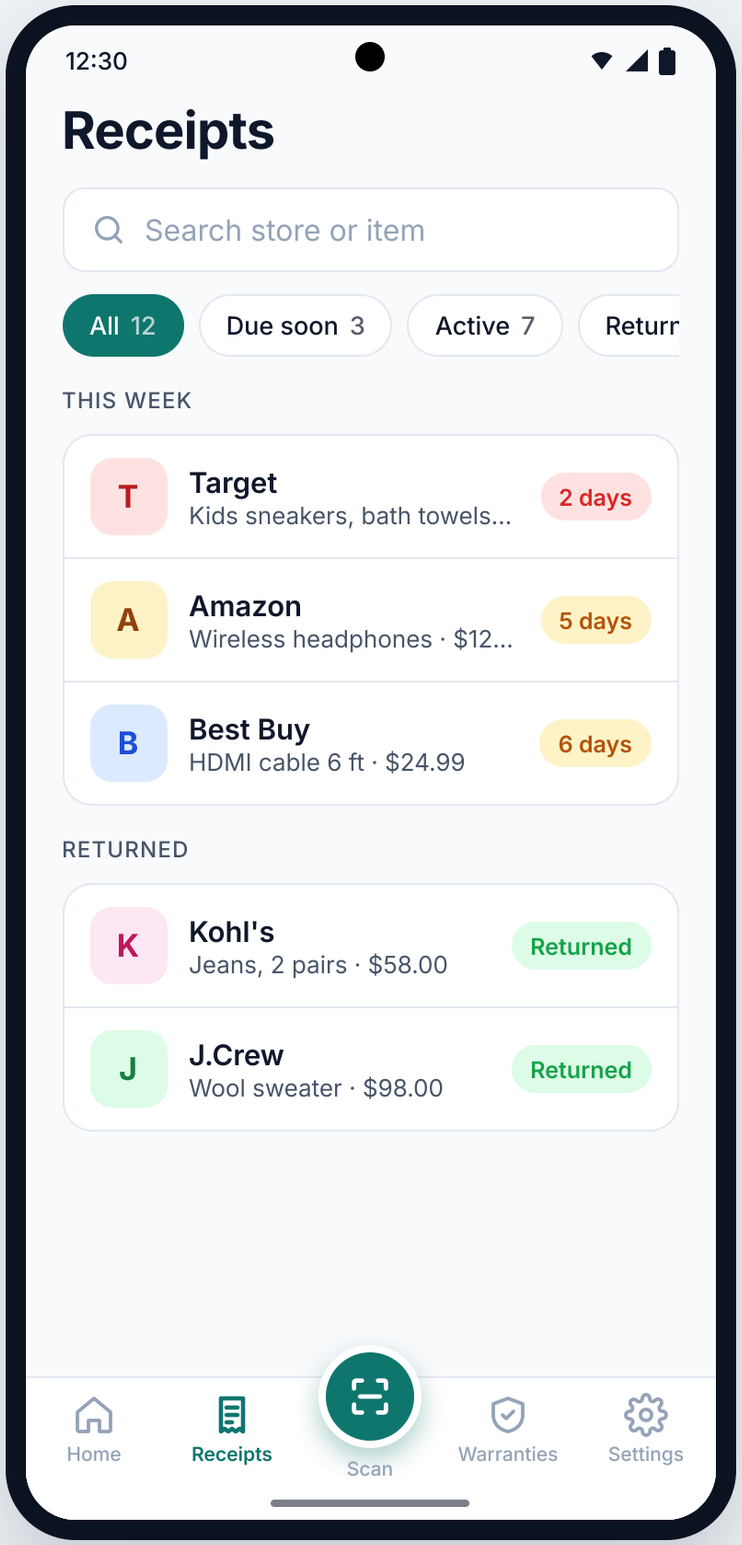

Store, days left, amount and items. Tapping opens that receipt (S12) even from a closed app.

The same screens on Android

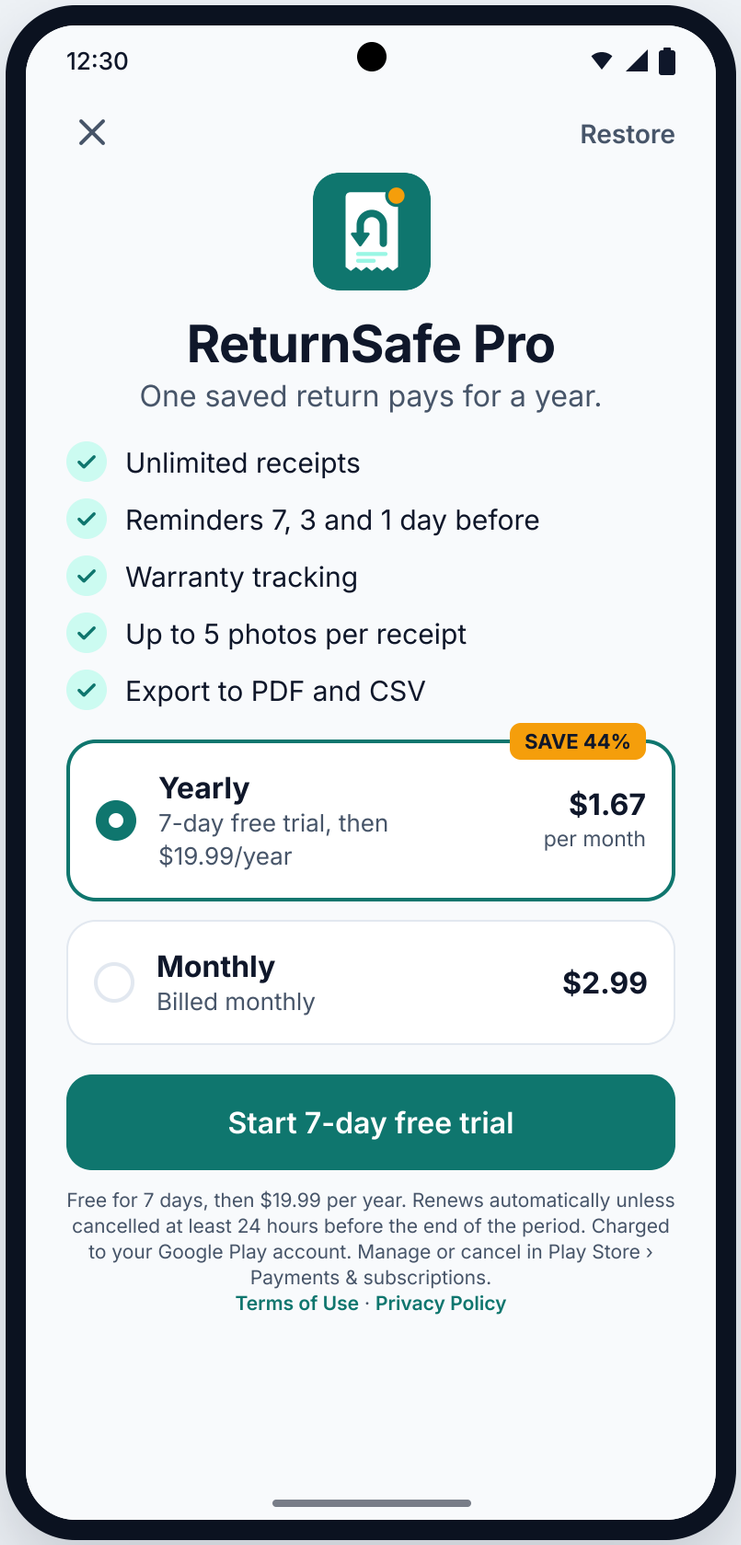

S08 Home Android

Identical layout. Edge-to-edge drawing with insets for the status and gesture bars.

S13 Receipts Android

Same list and chips. System back from a pushed screen returns here; back on a tab root leaves the app.

S15 Paywall Android

Same layout; the legal text names Google Play and its subscription settings.
